CAMBODIA FOOD PRICE AND WAGE BULLETIN

Agricultural Marketing
Office, DPS, MAFF

November 2014, Issue 69

HIGHLIGHTS

- Food purchasing power of households increased by 7.3% and 5.3% month-on-month in rural and urban areas, respectively.
- Retail price of lowest quality rice decreased by 0.8% in rural areas and increased by 0.1% in urban areas on a month-on-month basis.
- Wholesale price of mixed rice decreased by 2.9% month-on-month and 1.7% year-on-year.
- In October, inflation rate was 2.9 %, and overall food prices increased by 3.5% year-on-year.
- Vietnamese and Thai A1 Super white rice decreased by 6.0% and 2.0%, respectively month-on-month and
- International Food Price Index decreased 0.1% on a month-on-month.

Overview

This Bulletin is a joint publication¹ by the Agricultural Marketing Office (Department of Planning and Statistics) of the Ministry of Agriculture, Forestry and Fisheries (AMO MAFF) and the United Nations World Food Programme (WFP). It monitors the price of food commodities as well as wage rates for unskilled labor on a monthly basis. It also aims to detect changes and identify trends in the food purchasing power of vulnerable households.

International Food and Rice Prices

The FAO Food Price Index² measures the international price level of a basket of key food commodities. The index averaged 192.6 points in November 2014, a slight decrease of 0.1% on a monthon-month basis due mainly to a decline in prices of dairy and sugar. The International Rice Price Index averaged 232 points, a decrease of 1.3% on a month-on-month basis.

Regional Rice Wholesale Prices

In November 2014, the f.o.b. prices³ of Thai A1 Super white rice were 338 USD/mt and Vietnamese white rice (25% broken) were 379 USD/mt respectively (Figure 2).

Figure 2: Export price of Thai and Vietnamese white rice and Cambodia mixed rice⁴

Source: http://www.fao.org/es/esc/prices/PricesServlet.jsp?lang=en

1

¹ This publication has been produced jointly since September 2011.

² The FAO Food Price Index consists of the average of commodity group price indices (i.e. meat, dairy, cereals, oils/fats, and sugar) weighted with the average export shares of each of the groups for 2002-2004.

³ Free on board (f.o.b.) price includes all charges up to the placing of goods on board a ship at the port of departure specified by the buyer.

⁴ Mixed rice is considered a low-quality type of rice. The price in US\$ per metric tonne above was converted from the price in Riel per Kg.

The export price of Thai A1 Super white rice decreased 2.0% month-on-month and decreased 12.0% year-on-year. The price of Vietnamese white rice decreased by 6.0% month-on-month, but increased by 1.1% on a year-on-year basis. The decline in regional rice prices in this month reflect a slowdown in demand and the arrival of harvested crops on the market.

The price of Cambodian mixed rice in November was estimated at 407.7 USD/mt, decreases of 2.6% month-on-month following the trend of regional prices.

Cambodia Consumer Price Index (CPI)

The general Consumer Price Index (CPI)⁵ measures the cost of a consumption basket composed of 259 items. Each item is weighted based on their importance in an average household's expenditure⁶.

In October ⁷ 2014, the general CPI averaged 159.8 points, decreased 0.4% month-on-month. The inflation rate, as measured by the year-on-year increase in the CPI, was 2.9%. Food Price Index (FPI) measures the cost of the food items (comprise 43.2%) in the general CPI's consumption basket, was the main factor contributed to the increase in CPI. In October 2014, the FPI was 186.5 point, 0.9% lower than previous month but 3.5% higher than the same period last year (Figure 3). Food prices depend partly on gasoline prices through its contribution to its transportation cost. In October, even though the gasoline prices remained stable monthon-month, but it increased by 2.6% on a year-on-year basis.

Non-food prices averaged 139.6 points, remained stable month-on-month but increased 2.3% year-on-year.

Local Food Commodity Prices

Average wholesale price of mixed rice⁸ was 1,656.4 riel/kg in November 2014, a month-on-month decrease of 2.9%. In nominal terms, prices decreased by 1.7% on a year-on-year basis (Figure 4). In real terms, the wholesale price of mixed rice was 4.6% lower year-on-year.

⁵ The CPI is collected and reported by the National Institute of Statistics (NIS).

Figure 4: Nominal wholesale price of mixed rice, 2012-2014

Source: AMO MAFF, http://www.agriculturalmarketinformation.org.kh

In November 2014, the average retail price of the lowest quality rice⁹ in rural and urban areas was 1,736.7 riel/kg and 1,787.9 riel/kg, respectively. The prices decreased by 0.8% in rural areas, while the prices in urban areas increased by 0.1% month-on-month (Figure 5).

Figure 5 (a)(b): Nominal retail price of lowest quality rice, 2012-14

Source: WFP

On a year-on-year basis, in November 2014, nominal retail rice prices increased by 1.4% and 1.8 % in rural and urban areas, respectively. In real terms, the retail price of rice in rural and urban areas was 1.5 % and 1.1% lower than the same period in the previous year, respectively.

Retail prices of other food commodities (i.e. second quality rice, vegetable oil, smoked fish, fresh fish, pork, and duck eggs) in each of the 10 rural and 11 urban markets are presented in Appendix 2.

⁶ Relative item expenditure weights are derived from the 2004 Cambodia Socio-Economic Survey and adjusted to October-December 2006 price levels.

 $^{^{7}}$ November CPI values are not yet available at the time of producing this bulletin

⁸ The wholesale price of mixed rice is collected and reported by the Agricultural Marketing Office of the Ministry of Agriculture, Forestry and Fisheries.

⁹ Mixed rice, IR rice and Banla Pdao rice

Price Monitoring and Forecasting

FAO's price monitoring tool compares recent actual wholesale prices from AMO MAFF with "normal" price levels. The normal price level takes into account historical price levels and adjusts for inflation and seasonal factors. A discrepancy between current actual prices and "normal" prices indicates that current prices are higher or lower than what would be expected. In November 2014, the actual wholesale price of mixed rice was 1,656.4 riel/kg, 16.50% lower than the expected normal historical price.

Prices for the next three months were also projected, based on the current price, current inflation rate and seasonal factors. The high and low bands are also set so that actual prices will fall within the range 80% of the time. The prices were projected to decrease in December, January and February (Figure 6).

Figure 6: Normal and projected prices of wholesale rice

Source: AMO, WFP, FAO

Unskilled Wage

Daily wages of unskilled workers engaged in rice and non-rice farming and construction work are monitored by WFP on a monthly basis. In November 2014, the average wage of unskilled labor in rural and urban areas was 20,125 riel/day and 21,278 riel/day, respectively. The wage rate in rural and urban areas increased by 6.5% and 5.3% on a month-on-month basis, respectively (Figure 7).

Figure 7(a)(b): Daily wage of unskilled labor

Source: WFP

Terms of Trade

Terms of trade (ToT) is used to assess household purchasing power by taking the ratio of two different components, namely the daily wage rates of unskilled laborers and the retail price of lowest quality rice in the market. This gives an indication of the amount of rice that an unskilled wage laborer can purchase with a daily wage.

In November 2014, the ToT was 11.6 kg/day and 11.9kg/day in rural and urban areas, respectively. The ToT in rural and urban areas increased by 7.3% and 5.3% on a month-on-month basis, respectively (Figure 8). In rural area, the increase in ToT was due to increases in unskilled wage rate and decreases in retail price of rice. Moreover, the increase in ToT in urban areas was due to an increase in unskilled wage which outpaced an increase in retail price of rice, caused purchasing power to increase (Figure 8).
