

SUMMARY

- Fuel prices dominate the change with prices reaching 1,000 Yemen Riyals (YER) per litre for petrol with sharpest increase up to five-fold compared to the pre-crisis period.
- Food prices continue to increase with all food commodities well above the pre-crisis average, nearly doubled in some areas in Aden compared to the pre-crisis, putting a huge pressure on household budgets.
- Food commodities are reportedly disappearing from many markets in most crisis affected areas. Aden is affected the most with limited availability for all the main food supplies.

Summary of retail prices of key commodities

Wheat Flour:

Current Ave. Price: **218**
Average % Change: **+7%**

Aden has the highest prices (250). Aden, Sa'ada, and Amran observed relatively high increase rates at 9%, 10% and 9% of last month average price.

Onion:

Current Ave. Price: **274**
Average % Change: **+5%**

Aden and Sa'ada show the highest price (290), with 10% and 1% increases respectively from last month average.

Red Beans:

Current Ave. Price: **382**
Average % Change: **+5%**

Aden and Sa'ada have the highest price (400), a 5% and 3% increase respectively. Amran saw the sharpest increase (11% from last month average) at 355.

Vegetable Oil:

Current Ave. Price: **399**
Average % Change: **+3%**

Hajja has the highest price (420) with Sa'ada seeing the highest increase (7%) at 405.

Sugar:

Current Ave. Price: **266**
Ave. % Change: **+4%**

Sa'ada has the highest prices (350), a 0% increase. Aden has seen the highest % increase (8%) at 280 (from 249).

Cooking Gas:

Current Ave. Price: **3450**
Ave. % Change: **+14%**

Highest prices in Aden (4000) that also represents the largest increase (27%)

Market locations

Petrol:

Current Ave. Price: **925**
Average % Change: **+42%**

Highest prices in Aden (1000). The sharpest increase is observed in Sana'a at 58%.

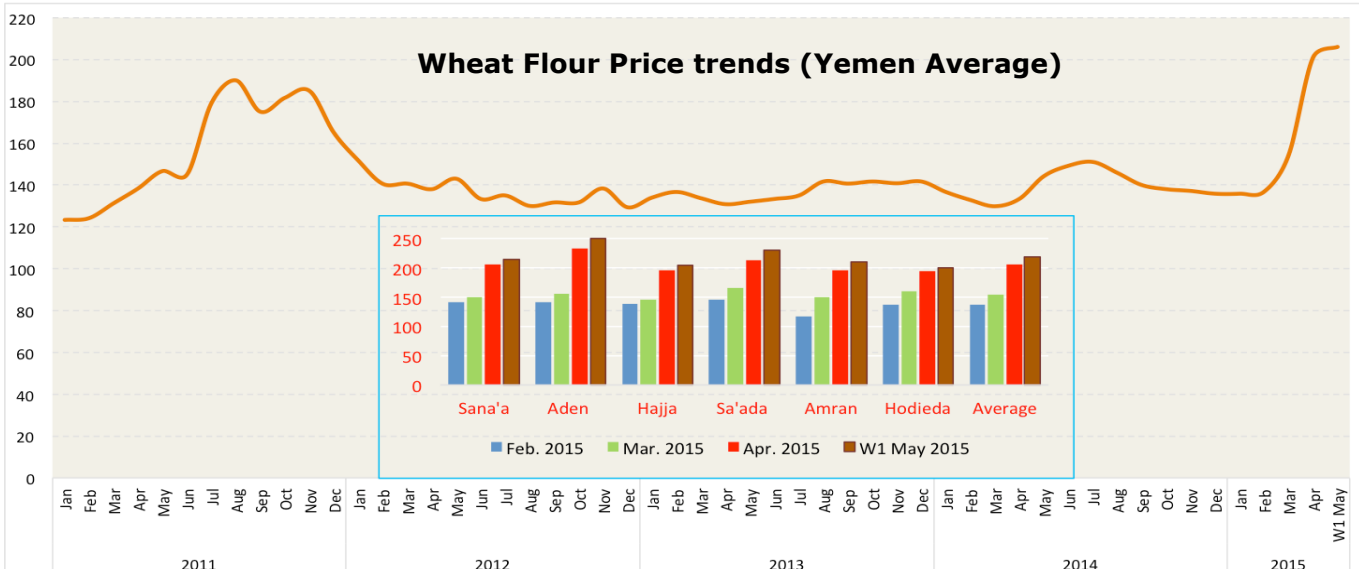

Diesel:

Current Ave. Price: **842**
Average % Change: **+41%**

Highest prices in Aden and Amran (900) with the largest increase at 49%.

The average price changes indicated are from the average of the previous month. The table on next page presents more details.
