

WFP Togo Country Brief

WFP Assistance

Community Based School Feeding Programme DEV 200304 (March 2012 – March 2018)	Total Requirements (in USD)	Total Received (in USD)	6 Months Net Funding Requirements (in USD) *
	3.6 m	1.1 m (31%)	N/A

* August 2017 - January 2018

Capacity development forms the cornerstone of the project's objectives, which focuses on contributing to sustainable solutions for a nationally-owned school meals programme through: (i) increased institutional and human capital development at central and local levels related to policy and management of the school meals programme; and (ii) strengthened linkages between local agricultural production and school meals, by providing technical assistance to the Government and partners.

School meals is considered a safety net which can help alleviate extreme poverty and severe food insecurity in poor populations in rural and remote areas. School meals help increase enrolment and attendance rates, contributing to overall improvement in school performance.

In this context, the Government of Togo has requested WFP's expertise in the areas of school meals, procurement (including local purchase), and logistics to assist the Government in developing and leading a national school meals programme relying on local food purchases. WFP's support focuses on the five standards of the System Approach for Better Education Results (SABER). These standards include a policy framework, institutional capacity and coordination, financial capacity, design and implementation capacity, and community participation.

Highlights

- The country office received a grant of USD 30,000 from the WFP regional bureau in Dakar to pursue the integration of nutrition and hygiene activities in Togo's national school meals project. Additional funds are needed to pursue capacity development augmentation activities in the schools such as training of the members of school meals committee.
- In line with the Integrated Road Map (IRM) process, Mrs. Suzanne Haho, a former Minister of Health and Social Affairs has been selected as lead convener by the Government in collaboration with WFP to conduct the Zero Hunger Review.

The school meals project contributes to WFP Strategic Objective 4 "Reduce undernutrition and break the intergenerational cycle of hunger". The project is also aligned with the Government's Poverty Reduction Strategy Paper (PRSP) 2013–2017 through Strategic axis 3, "Human resources, social protection and employment development" and with Strategic priority 2 "Equitable and sustainable access by the poor to quality basic social services" of the 2014–2018 United Nations Development Assistance Framework (UNDAF).

Throughout the implementation of the capacity development activities and consultations with government authorities and officials at central, community as well as local levels, WFP continuously advocates for gender equality.

Operational updates

- Mrs. Suzanne Haho appointed last month as lead convener has taken over her new function. Following consultations with the Country Strategic Plan teams in Togo and at WFP headquarters, she has started consultations at national level to establish the technical team which will undertake the Zero Hunger Review.
- To address the issue of weak capacity of actors in charge of school meals project in Togo, WFP regional bureau in Dakar provided the country office with a total of USD 30,000 to strengthen the capacities of 331 public primary schools. This grant will help undertake trainings for 331 teachers and 104 staffs from NGOs involved in school meals activities, specifically on nutrition. In addition, the 331 schools will receive trainings and sensitization materials for Nutrition Assessment Counselling and Support (NACS) activities for the benefit of schoolchildren and cooks in charge of the preparation and distribution of school meals.

Challenges

Funding is the main challenge that the project is facing. Resources are urgently needed to implement capacity strengthening activities planned under the fifth budget revision for a transition towards a nationally owned school meals programme.

Partnerships

- The technical committee of the DEV 200304 is formed by the representatives of eight ministries (Rural Development, Education, Agriculture, Finance and Health among others) involved in school meals activities. The World Bank supports the Community-based Development and Social Safety Nets project, PDCPlus, while UNICEF is providing WASH material and techniques. UNICEF will be highly involved in the training of primary school teachers on nutrition and hygiene. It will also provide chlorine tablets for the treatment of water at schools through its WASH department.
- A Memorandum of Understanding (MoU: 2016 to 2018) was signed on 7 July 2016 by WFP and the Government of Togo. This MoU clarifies respective roles and responsibilities for WFP technical assistance in delivering sustainable school meals and social safety net programmes. WFP works in collaboration with other UN agencies including UNICEF, FAO, ILO and UNDP to provide technical assistance and capacity augmentation in delivering sustainable school meals, social protection and contribute to achieving zero hunger in the country.

Country Background & Strategy

The ranking for Togo on the UNDP Human Development Report has not improved in recent years, dropping from 152 to 166 between 2007 and 2014. However, after thirteen years of economic decline due to political crisis and donor disengagement, the economic status of Togo has improved since 2006.

The overall poverty rate decreased from 58.7 percent in 2011 to 55.1 percent in 2015 – *Questionnaire Unifié des Indicateurs de Base de Bien-être* (QUIBB 2015). In 2014, the results of *Enquête Démographique et de Santé au Togo* (EDST-III, Demographic and Health Survey) showed that more than 28 percent of children under 5 were suffering from chronic malnutrition and 6.5 percent from acute malnutrition (1.5 percent suffering from severe acute malnutrition and 5 percent from moderate acute malnutrition). The acute malnutrition rate still remains high, particularly in the regions of Kara (7.2 percent) and Savannah (11.2 percent).

The net enrolment rate for girls is 85 percent against 88 percent for boys. This disparity is more pronounced in the northern areas of the country (Savannah) where the net school enrolment rate of girls is below 64 percent against 71 percent for boys.

WFP has been present in Togo since 1968.

Population: **6.2 million**

2015 Human Development Index:
166 out of 188

Income Level: **Least developed**

Chronic malnutrition: **28.0% of children between 6-59 months**
