

P4P Farmer Livelihood and Agricultural Production Follow-up Survey (Non-Impact Assessment)

Introduction

My name is _____ and I am working for the World Food Programme here in _____ [name of country]. We are conducting a survey of smallholder farmers. Let me first ask a few questions to determine whether you are the person I need to speak with.

Enumerator: Ask the verification questions at the bottom of the following box and follow the instructions to determine whether to continue the interview.

Enumerator: Conduct the interview with the head of this household or the spouse of the household head. Start the introduction over again if necessary when you meet the intended respondent.

The World Food Programme is an international organization that distributes food to those in need. The WFP wants to begin buying more of the food it distributes from smallholder farmers. We are talking with smallholder farmers so we can better understand the challenges they face producing or marketing crops and how WFP might best address these issues.

You were selected to participate in the survey because you are a smallholder farmer in an area where WFP works. The survey is voluntary and we will not share the information you give us with anyone else. We will never use the information in a way that identifies you. Your participation is voluntary and you can choose not to answer any or all of the questions if you want. However, we hope that you will participate since your views are important.

Your decision to participate in this interview, or not, will in no way affect, either positively or negatively, your chances of selling commodities to WFP.

The survey should take about two hours. Are you willing to participate in the survey? Do you have any questions?

Module J. Household Information

The first set of questions is about your household. By household I mean a group of people who live together, not necessarily in the same building; who usually eat from the same pot; and who pool their incomes and other resources to purchase or produce food. A household member is any person who, in the past 12 months, has lived with the household for at least 6 months regardless of whether they have intentions to stay or not. It also includes persons who have lived in the household for less than six months if they are a) attending school away from home, b) newly born babies, c) persons who are newly wedded into the household, or d) persons who have been in the household for less than 6 months but have come to stay permanently.

J1. How many people are in your household?	_ _
