Agenda Item 8

WFP/EB.A/2017/8-A/3\*

Operational Matters

Executive Board documents are available on WFP's website (<http://executiveboard.wfp.org>)

## **Mozambique Country Strategic Plan (2017–2021)**

Duration	1 July 2017–31 December 2021
Total cost to WFP	USD 167,656,459
Gender and age marker*	2A

\* <https://www.humanitarianresponse.info/system/files/documents/files/gm-overview-en.pdf>.

### **Executive Summary**

Mozambique achieved some hunger targets under Millennium Development Goal 1, but challenges remain in terms of Sustainable Development Goal 2, particularly with regard to chronic malnutrition rates and vulnerability to natural disasters, which are among the highest worldwide.

WFP's country strategic plan (2017–2021) draws on the findings from the zero hunger strategic review, lessons learned and consultations with stakeholders. It focuses on WFP's areas of strength that add value to the national zero hunger agenda and prioritizes support for government programmes and institutions, even when WFP plays an operational role. WFP will maintain its humanitarian assistance capacity while supporting long-term resilience and work to address the underlying causes of food insecurity and malnutrition. A gender and nutrition lens will be applied throughout the portfolio.

The following strategic outcomes will be addressed:

- i) Households in food-insecure areas of Mozambique are able to maintain access to adequate and nutritious food throughout the year, including in times of shock.
- ii) Shock-affected people in Mozambique are able to meet their basic food and nutrition needs during and immediately after a crisis.
- iii) Children in chronically food-insecure areas have access to nutritious food throughout the year.
- iv) Targeted people in prioritized areas of Mozambique have improved nutrition status in line with national targets by 2021.

#### **Focal points:**

Mr C. Nikoi  
Regional Director  
Southern Africa  
email: [chris.nikoi@wfp.org](mailto:chris.nikoi@wfp.org)

Ms K. Manente  
Country Director  
email: [karin.manente@wfp.org](mailto:karin.manente@wfp.org)

- v) Targeted smallholder farmers in northern and central Mozambique have enhanced livelihoods by 2021.
- vi) Humanitarian and development partners in Mozambique are reliably supported by efficient and an effective supply chain and information and communications technology services and expertise.

WFP's main partners are the Government, the Food and Agriculture Organization of the United Nations, the International Fund for Agricultural Development, the United Nations Children's Fund, the United Nations Population Fund, UN-Women and non-governmental organizations.

The country strategic plan is aligned with the Government's Vision 2025 and its Five-Year Plan (2015–2019), which are integrated with the Mozambique United Nations Development Assistance Framework (2017–2020), and contributes to WFP Strategic Results 1, 2, 3 and 8 in the WFP Strategic Plan (2017–2021).

### **Draft decision\***

The Board approves Mozambique Country Strategic Plan (2017–2021) (WFP/EB.A/2017/8-A/3\*) at a total cost to WFP of USD 167.7 million.

---

\* This is a draft decision. For the final decision adopted by the Board, please refer to the Decisions and Recommendations document issued at the end of the session.

## 1. Country Analysis

### 1.1 Country Context

1. Mozambique is a low-income food-deficit country<sup>1</sup> with a largely rural population of 28 million. It ranked 181st of 188 countries in the 2016 Human Development Index, 104th of 118 in the 2016 Global Hunger Index and 139th of 157 in the 2015 Gender Inequality Index.

### 1.2 Progress Towards SDG 2

#### *Progress towards SDG 2 targets*

2. Mozambique achieved some hunger targets under Millennium Development Goal 1,<sup>2</sup> but significant challenges remain in terms of Sustainable Development Goal (SDG) 2 targets.
3. *Access to food.* Economic access remains a major obstacle. In 2010,<sup>3</sup> 80 percent of the population was unable to afford an adequate diet and 46 percent lived below the poverty line.<sup>4</sup> Of households headed by women, 63 percent are poor – compared with 52 percent of those headed by men<sup>5</sup> – and at risk of food insecurity and negative coping strategies.<sup>6</sup> National safety nets do not yet provide for adequate nourishment for the most vulnerable people. Vulnerability to climate shocks further limits access to food. Mozambique also hosts long-term refugees and asylum seekers.<sup>7</sup>
4. Food insecurity affects 50 percent of households, 24 percent of them chronically;<sup>8</sup> 25 percent of households suffer from acute food insecurity at least once a year.<sup>9</sup>
5. *End malnutrition.* Chronic malnutrition (stunting) affects 43 percent of children under 5 – a rate classified as very severe;<sup>10</sup> stunting levels are significantly higher in northern provinces, at 55 percent in Nampula compared with 23 percent in Maputo, and recent progress has been limited. Acute malnutrition – wasting – increased from 4 percent in 2008<sup>11</sup> to 6 percent in 2011,<sup>10</sup> with regional peaks during climate shocks.<sup>12</sup>
6. Anaemia affects 70 percent of children under 5 and 55 percent of women of reproductive age.<sup>10, 13</sup> Vitamin A deficiency in children under 5 and iron deficiency in children under 2 both stand at 69 percent; iodine deficiency affects 68 percent of children aged 6–12 years.

<sup>11</sup> National Statistics Institute. *Multiple Indicator Cluster Survey 2008*. Maputo.

<sup>12</sup> During the 2016 El Niño drought, global acute malnutrition was 9 percent in Zambezia province and 6 percent in Sofala according to the Ministry of Health and the Technical Secretariat for Food and Nutrition Security.

<sup>13</sup> Mainly related to poor diet, malaria and intestinal parasites. United Nations. 2015. *Common Agenda for the Reduction of Chronic Undernutrition*. Maputo.

**Figure 1: Malnutrition among children under 5**

Note: IOF = *Terceiro Inquérito Nacional aos Orçamentos Familiares* (Third National Household Survey); MICS = multiple-indicator cluster survey.

7. Among the underlying causes of undernutrition are poverty and food insecurity.<sup>14</sup> The immediate causes include inadequate nutritional intake and diet diversity, poor knowledge of healthy foods, inadequate food preparation, infrequent meals and high levels of disease. Undernutrition is high even where food production is adequate. In addition, 64 percent of the rural population lacks access to clean water<sup>4</sup> and 90 percent do not use modern sanitation.
8. *Smallholder productivity and incomes.* Seventy percent of Mozambicans depend on subsistence agriculture;<sup>4</sup> fewer than 4 percent of smallholders are members of farmers' organizations,<sup>15</sup> most of which lack structure and support. Most smallholders sell their produce at low prices because people have limited access to credit and market information. Rural markets are not integrated. Post-harvest losses reach 30 percent because capacities for storage, processing and handling are limited.<sup>16</sup>
9. *Most farmers are women.*<sup>17</sup> They have smaller plots than men and use less fertilizer, pesticide and machinery; they experience more difficulties in access to and control over cash, land and livestock and are under-represented in farmers' organizations.
10. Sustainable food systems. Agriculture accounts for a third of gross domestic product (GDP).<sup>18</sup> Production of maize,<sup>19</sup> cassava, beans and legumes meets national demands, but rice, wheat, vegetable oil and meat are imported.<sup>20</sup> The food balance remains negative. Only 10 percent of arable land is cultivated, and only 3 percent irrigated.<sup>21</sup> Climate shocks also affect food production.

<sup>21</sup> African Development Bank Group. 2011. *Republic of Mozambique: Country Strategy Paper 2011–2015*. Maputo.

### **Macroeconomic environment**

11. In recent years, Mozambique has achieved 7.5 percent average annual GDP growth<sup>22</sup> driven largely by mining, transport, manufacturing and agriculture. However, this growth has not been sufficiently inclusive.<sup>23</sup> Increased use of domestic resources reduced overseas development assistance from 44 percent of the national budget in 2010 to 24 percent in 2015.<sup>24</sup>
12. The immediate economic outlook is challenged by high inflation and devaluation of the national currency. External debt reached 98 percent of GDP in 2016, significantly higher than the 37 percent average for sub-Saharan Africa. Long-term economic forecasts are generally positive, however.

### **Key cross-sectoral linkages**

13. Mozambique is highly prone to natural disasters. The southern and central regions experience regular droughts, and floods occur almost annually in major river basins and poorly drained urban settlements; 60 percent of the population lives in coastal areas affected by rapid-onset disasters. Recent projections suggest that the number of people at risk of hunger will increase by 10–20 percent by 2050 because of climate change, with 65 percent of these people living in sub-Saharan Africa.<sup>25</sup>
14. Of the adult population, 45 percent is illiterate: the rates are 30 percent for men and 58 percent for women. The retention rate in primary school grades 1–7 is only 36 percent. A higher proportion of girls drop out of school than boys, particularly in the upper grades as a result of, for example, early marriage and long distances to school.
15. The prevalence of HIV is 10.6 percent – the eighth highest in the world – and 1.5 million people, of whom 60 percent are women, are HIV-positive. HIV/AIDS is one of the leading causes of death, and prevention and treatment programmes face social and cultural barriers.
16. Average life expectancy is 55 years for men and 59 for women. Under-5 mortality decreased to 79 per 1,000 live births and infant mortality to 57 per 1,000 live births. The maternal mortality rate is 489 per 100,000 live births,<sup>26</sup> one of the highest in the world. Access to sexual and reproductive health services is limited.

### **1.3 Gaps and Challenges**

17. The zero hunger strategic review<sup>20</sup> and stakeholder consultations identified the following strategic gaps:
  - The operationalization of policy and legal frameworks, particularly at the sub-national level, is challenged by insufficient development of implementation strategies.
  - Insufficient implementation capacity in government institutions, limited availability of qualified staff and limited resources affect nutrition and food security programmes, particularly at the provincial and district levels.
  - National emergency preparedness and response capacities are insufficient to address frequent climate shocks, despite progress over recent years.
  - Fragmented multi-sectoral coordination between the Government and partners on food security and nutrition prevents consistency in programming and limits consideration of regional differences.
  - Access to markets and sustainable food systems is limited, constraining commercialization of food produced by smallholder farmers at affordable prices.

<sup>22</sup> International Monetary Fund. 2016. *Country Report No. 16/10*. Washington, D.C.

<sup>23</sup> UNDAF, Mozambique (2017–2020) country analysis.

<sup>24</sup> UNDAF, 2017–2020.

<sup>26</sup> See: <http://data.worldbank.org/indicator/SH.STA.MMRT/countries>

- Limitations in food security and nutrition data affect programme planning and targeting, the formulation of evidence-based policies and analysis of their impacts.

## 1.4 Country Priorities

### *Government priorities*

18. Food security and nutrition are national priorities in the following policy frameworks:
  - Agenda 2025 prioritizes access to food with a view to improving living conditions and developing human capital.
  - The Government's Five-Year Plan 2015–2019 focuses on empowering women and men for gender equity and equality, poverty reduction, economic development, and food security and nutrition.
  - The Operational Plan for Agricultural Development 2015–2019<sup>27</sup> aims to enhance food sovereignty by strengthening value chains, public–private partnerships and farmers' organizations.
  - The National Master Plan for the Prevention and Mitigation of Natural Disasters 2006–2016 is the basis for disaster risk management. The plan is complemented by the National Climate Change Adaptation and Mitigation Strategy, approved in 2012 and led by the Ministry of Land, Environment and Rural Development.
  - The National Strategy for Basic Social Security II (2016–2024) aims to improve the management and coverage of social security programmes, including during emergency response and recovery.
  - The 2013 *Programa nacional de alimentação escolar* (PRONAE; National School Feeding Programme) foresees the expansion of school feeding to all pre-primary and primary schools, emphasizing local procurement, community participation and nutrition education.
  - The National Multi-Sectoral Action Plan for the Reduction of Chronic Undernutrition 2011–2020 and its Food Fortification Strategy aim to reduce stunting in children under 5, recognizing wasting in pregnant and lactating women and girls and in children under 2 as risk factors for stunting.
  - The 2009 Strategy for Maternity Waiting Homes sets out dietary requirements for pregnant women close to delivery.

### *United Nations and other partners*

19. Mozambique was one of the first eight “Delivering as One” countries. The United Nations Development Assistance Framework (UNDAF) (2017–2020) is aligned with the Government's Five-Year Plan 2015–2019 and the 2030 Agenda for Sustainable Development.
20. Several United Nations agencies collaborate on food security and nutrition, including through the Scaling Up Nutrition initiative. WFP works with the United Nations Children's Fund (UNICEF) and the International Labour Organization (ILO) in support of the National Strategy for Basic Social Security.

## 2. Strategic Implications for WFP

### 2.1 WFP's Experience and Lessons Learned

21. In recent years, the country office has started to shift from direct implementation to support for the Government in taking over and developing zero hunger programmes, while retaining its ability to respond to disasters when government capacities are surpassed.

---

<sup>27</sup> The plan harmonizes the Five-Year Plan with the Strategic Plan for Agricultural Sector Development 2010–2019 and other national programmes for agriculture, food and nutrition, such as the National Food and Nutrition Strategy (ESAN II) and the Action Plan for the Food and Nutrition Security 2008–2015.

22. Recent evaluations of WFP's operations in Mozambique<sup>28</sup> concluded that the portfolio was aligned with WFP and government priorities and relevant to people's needs, recommending that WFP focus more on capacity development and technical support by building on its recognized strengths.<sup>29</sup> WFP should focus on the prevention of chronic malnutrition other than emergency response, enhance its monitoring and evaluation capacities and operationalize its gender-transformative approach throughout the portfolio.

## 2.2 Opportunities for WFP

23. The strategic review and stakeholder consultations recommended that WFP focus on the following areas, with due attention to gender equality:
- continue playing a lead role in humanitarian responses while building the Government's response capacities;
  - strengthen resilience to climate change and national disaster preparedness and management capacities where there are financial, technical and human resource constraints, particularly at decentralized levels;
  - enhance the responsiveness to shocks and zero hunger requirements of national social protection programmes, enabling them to scale up rapidly during crises and to maximize their contribution to food and nutrition security;
  - translate policy into action at the community level through increased consultation with communities with a view to developing locally relevant solutions – WFP can draw on its field and operational presence to support these efforts;
  - strengthen smallholder farmers' engagement in agricultural markets, reinforcing the Government's support and prioritizing demand-side elements of the value chain; and
  - address chronic malnutrition to reduce stunting, in line with national priorities.

## 2.3 Strategic Changes

24. Given the frequency and scale of emergencies, WFP's support will be needed for the foreseeable future even though the Government's emergency-response capacity has improved. WFP will seek to maximize the quality of responses, enhance climate change resilience and optimize government capacities for emergency preparedness and response and social protection at the national and decentralized levels with a view to reducing the need for external humanitarian support.
25. WFP will support the introduction of innovations and best practices into national integrated food security and nutrition analysis; this will be informed by an assessment of the institutional capacities of the Technical Secretariat for Food and Nutrition Security (SETSAN) and supported by an overall plan for capacity strengthening.
26. WFP support for PRONAE will continue, as the programme is expected to start using national resources<sup>30</sup> to fund scale-up during the country strategic plan (CSP) period. WFP will work with the Government to build its school feeding business case and will seek to make PRONAE more nutrition-sensitive and gender-transformative in line with the Government's Gender Strategy for the Education and Human Development Sector (2016–2020).
27. WFP will support treatment for moderate acute malnutrition during emergencies, focusing at other times on prevention of stunting and reduction of micronutrient deficiencies, in line with the Government's strategy for combating malnutrition.
28. WFP will focus on local food procurement for its operations and will support women and men smallholder farmers in obtaining access to markets other than WFP such as government institutions and programmes and private-sector partners in food fortification.

<sup>28</sup> Protracted relief and recovery operation 200355, country programme 200286 and trust fund 200574.

<sup>29</sup> Emergency response, disaster risk reduction, social protection, school feeding and logistics.

<sup>30</sup> Derived from a debt-for-development swap with the Government of the Russian Federation.

29. WFP's supply chain services are utilized increasingly by other actors, which recognize their efficiency and effectiveness. WFP will communicate its ability to provide such services more emphatically and expand its engagement in the strengthening of government capacities by leveraging its expertise in areas such as food storage, handling and accounting.
30. This CSP is informed by a country gender analysis and a gender action plan aligned with the regional gender strategy and the WFP Gender Policy (2015–2020), with a view to shifting to gender-transformative programming.

### **3. WFP Strategic Orientation**

#### **3.1 Direction, Focus and Intended Impacts**

31. This CSP takes into account the strategic review, lessons learned and consultations with stakeholders. It focuses on WFP's strengths with a view to adding value to the national zero hunger agenda, prioritizing support for government systems and institutions, even when WFP plays an operational role. WFP will maintain its humanitarian assistance capacities and support long-term resilience and work to address the underlying causes of food insecurity and malnutrition. All programming will consider gender equality and be nutrition sensitive. Gender-transformative and age-sensitive social and behaviour change communication adapted to specific contexts is mainstreamed throughout the CSP except for activity 7.
32. The CSP is aligned with the Government's Vision 2025 and its Five-Year Plan (2015–2019) and relevant sector policies and is integrated with the UNDAF (2017–2020). It operationalizes WFP's Strategic Plan (2017–2021) and Strategic Results 1, 2, 3 and 8 in the country.

#### **3.2 Strategic Outcomes, Focus Areas, Expected Outputs and Key Activities**

***Strategic outcome 1: Households in food-insecure areas of Mozambique are able to maintain access to adequate and nutritious food throughout the year, including in times of shock***

33. This strategic outcome adopts a multi-faceted approach to increasing resilience to climate change in national institutions and vulnerable communities with a view to reducing the need for humanitarian responses.
34. Strategic outcome 1 is aligned with WFP Strategic Result 1 and SDG target 2.1 and the following national SDG targets: priority 5, strategic objective 5 of the Five-Year Plan, section 4.4 of the Strategy and Action Plan for Food Security and Nutrition II, and pillar 1 of the National Strategy for Basic Social Security II (2016–2024).

#### ***Focus area***

35. This strategic outcome contributes to resilience-building.

#### ***Expected outputs***

36. Strategic outcome 1 will be achieved through five outputs:
  - People in shock-prone areas benefit from the Government's strengthened capacity to plan and prepare for, respond to and recover from shocks in order to meet their basic needs in times of crisis.
  - Shock-affected people benefit from the Government's strengthened capacity to provide expanded safety-net services in order to meet their basic needs in times of crisis.
  - Targeted food-insecure communities benefit from construction and/or rehabilitation of assets that improve food security and build resilience to natural shocks and climate change.
  - Targeted households benefit from improved knowledge in nutrition, care practices and healthy diets in order to improve their food consumption and nutrition status.
  - Targeted food-insecure communities receive conditional cash- and/or food-based transfers in order to improve their food consumption.

*Key activities*

37. *Activity 1: Provide capacity strengthening to prepare for, respond to and recover from weather-related shocks to the government at the national, sub-national and community levels.* WFP will support the preparedness, planning, management and coordination capacities of the National Institute for Disaster Management (INGC) and other relevant entities, particularly at decentralized levels. An initial capacity assessment will lead to a systematic approach and improved alignment between WFP and other partners such as UNICEF, the United Nations Development Programme, the Food and Agriculture Organization of the United Nations (FAO), UN-Women and non-governmental organizations (NGOs).
38. WFP will support SETSAN and other bodies in integrated food security and nutrition analyses, monitoring and information management, with emphasis on nutrition data. The Fill the Nutrient Gap (FNG) tool<sup>31</sup> will provide additional evidence to inform such programming.
39. The three-pronged approach will be scaled up at the national, provincial and community levels to facilitate multi-stakeholder involvement and multi-disciplinary approaches to resilience-building.
40. *Activity 2: Provide technical assistance to the Government in making social protection programmes shock-responsive and hunger-sensitive.* WFP will work with the Ministry of Gender, Children and Social Action and INGC to enhance the shock-responsiveness of national social protection programmes by, for example, enhancing alignment between social protection and humanitarian systems, improving the standards of assets to increase the preparedness and adaptive capacities of the Productive Safety Net Programme (PASP) with regard to climate risks, and exploring options for improving the nutrition outcomes of programmes.
41. WFP will provide assistance in the form of food and cash-based transfers (CBTs) in coordination with the PASP for asset creation with a view to enhancing resilience at the community level in line with the three-pronged approach, focusing on the quality and relevance of assets, identification of nutrition-relevant assets, and assets that benefit women and are controlled equally by women and men. This will involve community-based participatory planning and may include assets to improve access to markets and health centres and recovery of degraded land to support local production of diverse and nutritious foods. WFP will ensure equitable participation of women and men at all stages. Lessons learned will inform the Government's productive safety net programming.

***Strategic outcome 2: Shock-affected people in Mozambique are able to meet their basic food and nutrition needs during and immediately after a crisis***

42. WFP will continue to address shock-related food security and nutrition needs when they exceed the capacities of the Government. WFP will support humanitarian coordination by co-chairing the humanitarian country team and the Food Security Cluster, which comprise representatives of United Nations agencies, NGOs and donors. It will also support refugees in the country. Strategic outcome 2 supports WFP Strategic Result 1, SDG target 2.1, and objectives 1 and 2 of the National Master Plan for the Prevention and Mitigation of Natural Disasters.

***Focus area***

43. This strategic outcome focuses on crisis response.

*Expected outputs*

44. Strategic outcome 2 will be achieved through three outputs:
  - Shock-affected people receive unconditional cash and/or food-based transfers in order to meet their basic food and nutrition requirements.
  - Shock-affected malnourished children and pregnant and lactating women receive specialized nutritious foods in order to treat and reduce acute malnutrition rates.

---

<sup>31</sup> See strategic outcome 4.

- Shock-affected people benefit from improved knowledge in nutrition, care practices and healthy diets in order to improve their nutritional status.

#### *Key activities*

45. *Activity 3: Provide cash and/or food transfers to vulnerable households affected by crisis.* WFP will provide food and nutrition assistance when needs exceed the Government's institutional and financial response capacities; equal benefits for women and men will be ensured. The scope of the activity is based on previous years' disaster trends and includes assistance for relief in response to shocks, including slow-onset droughts, rapid-onset floods and other natural and human-caused shocks. The activity also includes early recovery and treatment of moderate acute malnutrition. The current plan provides emergency school feeding until at least December 2017. In case of major emergencies, strategic outcome 2 will be augmented to enable WFP to provide food and nutrition assistance adapted to the situation.
46. This activity includes support for food and nutrition assessments, training, system development and learning directly linked to the implementation and quality enhancement of WFP's emergency responses.
47. WFP will provide food assistance for refugees in Maratane camp. The number of refugees requiring assistance is expected to fall during the CSP as complementary support for livelihoods and self-reliance activities for refugees in cooperation with the Office of the United Nations High Commissioner for Refugees (UNHCR), UN-Habitat and FAO take effect; this activity will also serve as a testing ground for new approaches to addressing protracted refugee displacement.

#### ***Strategic outcome 3: Children in chronically food-insecure areas have access to nutritious food throughout the year***

48. Strategic outcome 3 supports PRONAE in providing nutritious meals for vulnerable school-age children, primarily through capacity development to enhance the capacities of the Ministry of Education and Human Development to manage the scaled-up programme sustainably. Direct implementation by WFP will gradually decrease as the ministry assumes greater management responsibility.
49. The outcome is in line with WFP Strategic Result 1, SDG target 2.1, the primary objective of PRONAE, the Education Sector Strategic Plan (2012–2019), and the Gender Strategy of the Education and Human Development Sector (2016–2020).

#### ***Focus area***

50. This strategic outcome focuses on root causes.

#### *Expected outputs*

51. Strategic outcome 3 will be achieved through three outputs:
  - Schoolchildren targeted by the national home-grown school feeding programme benefit from improved design, finance and implementation capacity of the Government that helps meet their basic food and nutrition needs and increase school attendance and retention.
  - WFP-targeted schoolchildren receive a nutritious meal every day they attend school in order to meet basic food and nutrition needs and increase school attendance and retention.
  - Targeted schoolchildren benefit from improved knowledge of nutrition, care practices and healthy diets to improve their nutrition status.

#### *Key activities*

52. *Activity 4: Strengthen the capacity of the government bodies responsible for the national home-grown school feeding programme.* WFP's capacity strengthening for the Ministry of Education and Human Development will focus on: i) enhancing the funding base for school feeding through cost-benefit analyses and an advocacy plan for PRONAE; ii) strengthening inter-sectoral coordination for PRONAE; iii) training of school council members and school feeding managers; iv) training in supply chain management and monitoring; v) hygiene and nutrition education; and vi) school gardening.

53. WFP will co-implement PRONAE with the Ministry of Education and Human Development and continue to test implementation models to inform government decision-making and investment, including in addressing micronutrient deficiencies through use of fortified foods, micronutrient supplementation and diet diversification. The FNG tool will help develop strategies to improve the nutrient intake of adolescent girls in school.
54. WFP will promote gender transformation in PRONAE through: i) community-level initiatives to increase knowledge of gender equality and women's empowerment; ii) pilot distributions of take-home rations for girls in the upper grades of primary school, where dropouts increase significantly among girls; iii) an evaluation of the pilot to inform government decision-making; and iv) promotion of women's representation in school feeding management committees and related training.

***Strategic outcome 4: Targeted people in prioritized areas of Mozambique have improved nutrition status in line with national targets by 2021***

55. Levels of stunting and micronutrient deficiencies are high, and wasting, although relatively rare, contributes to stunting. The Government aims to be self-reliant in programmes based on specialized nutritious foods.
56. WFP will obtain evidence through four studies and one intervention to support the Government in achieving its nutrition objectives through increased availability of, access to, demand for and/or consumption of safe nutritious foods, and/or nutrition-related services. The aim is to reduce micronutrient deficiencies among women and girls of reproductive age and stunting in children under 5 in a context where HIV prevalence is high. Additional interventions may be added to this outcome on the basis of evidence gathered. WFP will work with partners in the United Nations Network for Scaling Up Nutrition (SUN)<sup>32</sup> and with the Global Alliance for Improved Nutrition (GAIN) in the SUN Business Network.
57. Strategic outcome 4 is aligned with WFP Strategic Result 2, SDG target 2.2, priority 2, strategic objective 2 of the Five-Year Plan, and the National Multi-Sectoral Action Plan for the Reduction of Chronic Undernutrition (2011–2020).

***Focus area***

58. This strategic outcome focuses on root causes.

***Expected outputs***

59. Strategic outcome 4 will be achieved through two outputs:
  - Vulnerable people in Mozambique benefit from strengthened, evidence-based national capacity to combat stunting and micronutrient deficiencies in order to improve their nutrition status.
  - Vulnerable people in Mozambique benefit from improved knowledge in nutrition, care practices and healthy diets in order to improve their nutrition status.

***Key activities***

60. *Activity 5: Provide capacity strengthening and technical assistance to government entities implementing the national strategy to combat stunting and micronutrient deficiencies.* A study using the FNG tool and incorporating participatory gender analysis will identify barriers to the availability of, access to, demand for and consumption of safe and nutritious foods and nutrition-related services in development and emergency settings, identify cost-effective options for transfer modalities and inform integrated food security and nutrition strategies and optimize nutrition-related aspects of other CSP activities.<sup>33</sup>
61. WFP and the Ministry of Health will seek to improve nutrition practices among parents of young children, and increase access to maternity waiting homes for pregnant women and adolescent girls. A study will explore: i) whether incentives enhance uptake of this service; ii) ways of

<sup>32</sup> Comprising FAO, IFAD, UNFPA, UNICEF and the World Health Organization.

<sup>33</sup> See strategic outcomes 3 and 5.

- increasing access to antenatal care services and maternity waiting homes through awareness-raising among women and girls; and iii) education options for women and girls in waiting homes to enhance their nutrition-sensitive practices for preventing stunting.
62. A third study will explore the feasibility of national production of SuperCereal for treatment of moderate acute malnutrition in children over 5, adolescent girls and boys and adult women and men by leveraging WFP's partnership with large-scale food fortification companies.
  63. In view of the link between HIV and acute malnutrition, WFP will support the Government in understanding the extent to which reducing acute malnutrition among pregnant and lactating women and girls, and children under 5 drives uptake and retention of clients in HIV treatment programmes. This will inform the Government's HIV and nutrition policies and programmes.
  64. WFP will help to reduce micronutrient deficiencies among women and adolescent girls who are pregnant or of reproductive age by increasing the availability of specialized and staple fortified foods. It will assist the Ministry of Industry and Commerce in expanding fortification programmes and strengthening fortification facilities for wheat and maize flour, vegetable oil and sugar and rural hammer mills fortifying maize flour. The FNG study will identify further options for the national food fortification strategy.
  65. WFP will continue to develop gender-transformative and age-sensitive models for the national social and behaviour change communication programme, focusing on food fortification and healthy diets, infant and young child feeding practices, and health and nutrition among women and girls of reproductive age.

***Strategic outcome 5: Targeted smallholder farmers in northern and central Mozambique have enhanced livelihoods by 2021***

66. Mozambique was one of the first countries to participate in the Purchase for Progress and Purchase from Africans for Africa initiatives. WFP is working with FAO and the International Fund for Agricultural Development (IFAD) on agricultural supply chains and will continue to support the Government and farmers' organizations in increasing the range of competitive markets for smallholders and commercial growers. WFP will work with FAO and IFAD to enhance synergies related to access to production factors, productivity and value addition and to shorten value chains so that farmers can increase their market share.
67. This outcome is aligned with WFP Strategic Result 3, SDG target 2.3, priority 2, strategic objective 1 of the Five-Year Plan and the Operational Plan for Agricultural Development.

***Focus area***

68. This strategic outcome focuses on root causes.

***Expected outputs***

69. Strategic outcome 5 will be achieved through two outputs:
  - Targeted smallholder farmers benefit from WFP value chain support in order to improve access to profitable markets and increase their incomes.
  - Targeted smallholder farmer households benefit from improved knowledge in nutrition, care practices and healthy diets to improve their nutrition status.

***Key activities***

70. *Activity 6: Enhance the aggregation, marketing and decision-making capacities of smallholder farmers, with focus on women.* WFP will work with FAO and provincial and district-level structures of the Ministry of Agriculture and Food Security to increase the number of smallholders in farmers' organizations and strengthen the capacities of farmers' organizations for business and organizational management and aggregation, food storage and handling, and quality control to reduce post-harvest losses. WFP will prioritize organizations led by women and will support women members by promoting labour-saving technologies and gender-awareness training for women and men. The country office will draw on experience in other

countries to inform its work on access to agricultural markets.<sup>34</sup> Strategic outcome 5 may be augmented depending on needs and funding availability.

***Strategic outcome 6: Humanitarian and development partners in Mozambique are reliably supported by an efficient and effective supply chain and information and communications technology services and expertise***

71. There is increasing demand from partners for WFP's supply chain management services and recognized expertise to fill capacity gaps and ensure more effective delivery of zero hunger programmes in humanitarian and development contexts. This outcome is in line with WFP Strategic Result 8, SDG target 17.16 and pillar 3, and strategic objective 1 of the Five-Year Plan 2015–2019.

***Focus area***

72. This strategic outcome focuses on resilience-building.

***Expected outputs***

73. Strategic outcome 6 will be achieved through two outputs:
- Vulnerable communities benefit from WFP provision of supply chain and information technology services and expertise to the Government and other partners that improve the effectiveness of development and humanitarian programmes.
  - Vulnerable communities benefit from increased supply chain capacity of the Government and other partners that improves the effectiveness of development and humanitarian programmes.

***Key activities***

74. *Activity 7: Provide supply chain services for humanitarian and development partners.* WFP will strengthen the capacities of national institutions in areas that include food management, handling and storage, and accounting. It will provide supply chain services for the Ministry of Health, the Ministry of Education and Human Development, INGC, UNICEF, the United Nations Population Fund (UNFPA), the World Bank, donors such as the United States Agency for International Development, and NGOs. The services will include food procurement, storage and handling, customs clearance, inventory management, transport, and quality and quantity control. WFP will manage and coordinate humanitarian logistics and telecommunications clusters when these are activated.

**3.3 Transition and Exit Strategies**

75. WFP's transition and exit strategy is based on progressively moving towards the longer-term goal of a hunger-free Mozambique. As government capacity to address hunger and malnutrition effectively increases and related systems are strengthened, WFP's support will gradually reduce and focus more on technical assistance and filling any persisting capacity gaps. To move in this direction during the CSP period, support for national ownership of zero hunger programmes is the guiding principle underlying all activities in this CSP. WFP's portfolio focuses on capacity strengthening and technical assistance to enhance the Government's ability to manage high-quality programmes, advance gender equality, and gather evidence for improved national advocacy, policy direction and programming for zero hunger. Where WFP plays an operational role, it will do so in combination with capacity strengthening and learning initiatives.

---

<sup>34</sup> Malawi for food exchanges, Uganda for post-harvest losses and Zimbabwe for risk mitigation.

## 4. Implementation Arrangements

### 4.1 Beneficiary Analysis<sup>35</sup>

<b>Strategic outcome</b>	<b>Activity</b>	<b>Women/girls</b>	<b>Men/boys</b>	<b>Total</b>
1	Activity 2	10 400	9 600	20 000
2	Activity 3	282 103	265 897	548 000
	Rapid onset relief assistance	83 200	76 800	160 000
	Slow onset relief assistance	41 600	38 400	80 000
	Early recovery assistance	197 600	182 400	380 000
	Emergency school feeding	47 863	52 137	100 000
	Treatment of moderate acute malnutrition: children under 5	7 680	8 320	16 000
	Treatment of moderate acute malnutrition: pregnant and lactating women and girls	4 000		4 000
	Refugees: half rations	1 560	1 440	3 000
	Refugees: full rations	2 600	2 400	5 000
3	Activity 4	174 359	189 926	364 285
<b>Total*</b>		<b>570 862</b>	<b>561 423</b>	<b>1 132 285</b>
<b>Adjusted total (excluding overlaps)</b>		<b>466 862</b>	<b>465 423</b>	<b>932 285</b>

\* Cumulative beneficiary figures; adjusted total includes overlaps among activities; the recovery caseload is excluded because it overlaps with the relief caseload.

76. The three-pronged approach and climate risk analysis will inform geographical targeting for asset creation in Activity 2. WFP's target population will be at least 50 percent women for community-based participatory planning and food assistance-for-assets interventions. Beneficiaries of activity 3 will be targeted on the basis of Integrated Food Security and Nutrition Phase Classification. Refugees receiving food assistance are identified by UNHCR; full rations are provided for new and vulnerable refugees and half rations for long-term refugees. Activity 4 targets primary-school pupils where indicators for chronic food insecurity are high and those for education are low.
77. Capacity strengthening and service delivery interventions will target ministries, national institutions and individuals.
78. The country office will use beneficiary feedback mechanism to maximize accountability to affected populations and hence the quality and transparency of its interventions. A dedicated telephone line and email address will receive complaints and observations directly from beneficiaries.

### 4.2 Transfers

#### *Food and cash-based transfers*

79. In-kind food baskets reflect local dietary habits and nutritional requirements. Maize meal and vegetable oil are fortified and salt is iodized. School meals are complemented with fresh produce purchased locally. The ration for pregnant women and girls – 333 g of SuperCereal per day<sup>36</sup> – is based on the Ministry of Health protocol for nutrition rehabilitation.

<sup>35</sup> Actual beneficiary figures will be disaggregated by sex and age.

<sup>36</sup> See Table 2.

80. Regular monitoring of markets, which will include mobile monitoring, will inform decisions on CBT programming under activities 2 and 3. CBTs are based on market prices and adjusted to account for price fluctuations. Under activity 2, 70 percent of transfers will be CBTs, assuming that markets are stable. Under activity 3, 50 percent of conditional transfers will be food vouchers. WFP will explore CBT options for refugees. All transfers will benefit women and men equally.

TABLE 2: FOOD (G/PERSON/DAY) OR CBT VALUE (USD/PERSON/DAY) BY STRATEGIC OUTCOME AND ACTIVITY

	Strategic outcome 1		Strategic outcome 2												Strategic outcome 3		
Activity	Provide technical assistance to the Government in making social-protection programmes shock-responsive and hunger-sensitive		Provide cash and/or food transfers for vulnerable households affected by crisis												Strengthen the capacity of the government bodies responsible for the national home-grown school feeding programme		
Beneficiary type	Standard	Standard	Refugees full ration	Refugees half ration	Refugees full ration	Refugees half ration	Children 6–59 months	Pregnant women and girls	Emergency school feeding	Rapid-onset emergency relief		Slow-onset emergency relief		Early recovery		Standard	Standard

CBTs (USD)		31 772 777
<b>Total food and CBTs (USD)</b>	<b>43 049</b>	<b>57 926 199</b>

### ***Capacity Strengthening including South–South Cooperation***

81. Capacity strengthening cuts across all activities, and three are devoted to it. WFP aims to maintain its operational capacities for service delivery and humanitarian assistance, and to enhance institutional and community capacities to design and deliver zero hunger initiatives.
82. South–South cooperation will be sought: Mozambique might, for example, become a provider of expertise in emergency preparedness and response for other countries. WFP works with the Centre of Excellence in Brazil and the Brazilian Cooperation Agency on school feeding, and may engage with the new centre of excellence in the Russian Federation. Brazil is a major partner in social protection under the Partnership for National Social Development Initiative and in market access under Purchase from Africans for Africa.

### **4.3 Supply Chain**

83. Food purchases will prioritize local procurement, a government priority, including from men and women smallholder farmers. Regional purchases will be made from WFP’s Global Commodity Management Facility. Specialized nutritious foods – SuperCereal Plus, ready-to-use supplementary foods and premix for fortification – will be sourced internationally. WFP will explore the feasibility of local production of SuperCereal (see strategic outcome 4). Food deliveries will be made by private-sector organizations using WFP supply chain networks. Food quality will be managed with support from the regional bureau. An e-voucher system using SCOPE cards will be used for CBTs.

### **4.4 Country Office Capacity and Profile**

84. The focus on gender equality, capacity development and technical assistance requires reorganization of the country office and training for staff to establish the necessary skill sets. Training in the Corporate Results Framework and the financial framework will also be required. WFP will maintain its sub-offices supporting field operations, using a “light footprint” approach to minimize costs and enhance flexibility.

### **4.5 Partnerships**

85. WFP will work with the Ministry of Agriculture and Food Security as coordinator for SDG 2, SETSAN, INGC, the Ministry of Gender, Children and Social Action, the Ministry of Education and Human Development, the Ministry of Economy and Finance, the Ministry of Health, the Ministry of Land, Environment and Rural Development, the Ministry of Industry and Commerce and the Ministry of Foreign Affairs and Cooperation.
86. WFP will partner: i) FAO on resilience, fortification, social and behaviour change communication, market access and coordination of SDG 2 activities and the Food Security Cluster; ii) IFAD on social and behaviour change communication and market access; iii) UNICEF, ILO and the World Bank on social protection; iv) UNICEF, UNFPA and the World Health Organization on nutrition; v) UNHCR on refugees; and vi) United Nations agencies and civil society organizations on gender equality initiatives.

87. As co-chair of the SUN Business Network with GAIN, WFP will work with private-sector partners on fortification and market access linkages such as with PRONAE.
88. NGOs and strategic partners will be operational in delivering this CSP, particularly in humanitarian response, resilience and nutrition. WFP plans to enhance coordination with major stakeholders, including NGOs and bilateral donors, and explore synergies for further strategic investments.

## **5. Performance Management and Evaluation**

### **5.1 Monitoring and Evaluation Arrangements**

89. Gender-responsive monitoring and evaluation will be guided by the country office monitoring, review and evaluation plan.<sup>37</sup> Baseline data will be collected within three months of the start of an activity and targets will be set for each indicator. Outputs will be monitored monthly at the field and country office levels. The collection of annual outcome data, evaluations and reviews will be led by the monitoring and evaluation unit.
90. The country office will consider outsourcing, using remote monitoring and increasing the use of mobile data-collection tools; SCOPE will be used for CBT programming, and joint monitoring will be increased to achieve more comprehensive monitoring at reduced cost.
91. The country office will establish a monitoring and evaluation unit and employ a full-time monitoring and evaluation assistant in each sub-office. There will be a mid-term review and a final portfolio evaluation; decentralized evaluations and reviews that include a focus on gender equality and protection will examine activities 5 and 6 in 2018, activities 2 and 3 in 2019, and activity 4 in 2020.

### **5.2 Risk Management**

92. Contextual, programmatic and institutional risks and mitigation measures will be periodically reviewed and updated.
93. Insecurity, fuel price increases and exchange rate fluctuations may affect cargo movements and the costs of imported foods. WFP will prioritize local procurement and will review and adjust logistics arrangements regularly, with support from the regional bureau as needed.
94. The economic situation may affect the Government's delivery of social services and hence exacerbate the food security and nutrition status of the most vulnerable people. WFP will augment its humanitarian response as required.
95. Potential risks regarding the choice of transfer modalities – food, CBTs – will be managed through regular market price monitoring and sectoral assessments, with attention to gender equality and protection issues, and by developing common standards with the Government and humanitarian partners.
96. Difficulties in local procurement of food and other items will be addressed through regular updates of the list of service providers. To ensure that competent local partners are available, WFP will screen potential partners at the start of the CSP and invest in building the capacities of national NGOs, particularly those that are committed to gender equality.
97. Staffing readiness will be reviewed before the start of the CSP, and training will be provided to address capacity gaps. Additional technical expertise will be sourced through partnerships and South–South cooperation as required.

---

<sup>37</sup> The logical framework includes indicators related to programmes and trust funds carried over from previous operations.

## 6. Resources for Results

### 6.1 Country Portfolio Budget

<b>Strategic outcome</b>	<b>Year 1* 2017</b>	<b>Year 2 2018</b>	<b>Year 3 2019</b>	<b>Year 4 2020</b>	<b>Year 5 2021</b>	<b>Total</b>
1	2 875 148	4 797 411	4 780 219	4 119 970	3 974 007	<b>20 546 756</b>
2	18 118 292	17 280 911	10 488 320	7 892 125	4 816 796	<b>58 596 444</b>
3	6 375 697	13 803 656	14 462 195	14 043 983	13 508 476	<b>62 194 008</b>
4	1 312 461	1 370 487	1 936 443	1 714 491	1 513 518	<b>7 847 400</b>
5	905 981	353 816	0	0	0	<b>1 259 797</b>
6	7 008 358	6 166 678	2 113 399	927 241	996 378	<b>17 212 054</b>
<b>Total</b>	<b>36 595 938</b>	<b>43 772 959</b>	<b>33 780 577</b>	<b>28 697 810</b>	<b>24 809 175</b>	<b>167 656 459</b>

\* July–December.

98. The total cost of this CSP over 54 months is USD 167.7 million. Of this, strategic outcomes 1, 2 and 3 account for the largest share because they involve high proportions of food transfers and CBTs. The costs of strategic outcomes 4 and 5 result from investments in national capacity development in nutrition and market access for smallholders. The cost of strategic outcome 6 reflects demand for supply chain services. Gender equality initiatives will account for 15 percent of project funds.

### 6.2 Resourcing Outlook

99. The cost of the CSP is realistic and matches recent resourcing trends – an average USD 33 million annually over the last five years,<sup>38</sup> of which USD 17 million is humanitarian funding. Current confirmed and forecast contributions cover half of CSP requirements.

### 6.3 Resource Mobilization Strategy and Resource Prioritization

100. The resource mobilization and partnership strategy based on consultations with donors will be regularly updated: this will include exploring options for direct funding from the Government following the example of the debt-for-development swap for PRONAE.

101. WFP will seek joint resourcing opportunities with UNICEF, UNFPA, the World Health Organization and FAO in nutrition and with UNICEF and ILO in social protection.

102. In the event of funding shortfalls, to the extent possible, WFP will give overall priority to life-saving interventions, followed by those advancing gender equality and long-term capacity development. Other prioritization options will include reducing the costs of staffing and field presence and phasing out under-resourced activities.

<sup>38</sup> This refers to the full portfolio: country programme 200286, protracted relief and recovery operation 200355, trust funds 200574 and 200962 and bilateral operation 200554.

## ANNEX I

**LOGICAL FRAMEWORK FOR  
MOZAMBIQUE COUNTRY STRATEGIC PLAN (2017–2021)**

Items formulated at country level

Elements from the Strategic Plan

Categories and indicators from the Corporate  
Results Framework

**Country: Mozambique**

**CSP Start Date:** 01/07/2017 **CSP End Date:** 31/12/2021

**LOGICAL FRAMEWORK**

**Strategic Goal 1** *Support countries to achieve zero hunger*

**Strategic Objective 1** *End hunger by protecting access to food*

**Strategic Result 1** *Everyone has access to food (SDG Target 2.1)*

**National SDG targets and indicators:** Five-Year Government Plan (PQG) Priority 5, Strategic Objective 5: Reduce communities' vulnerability to natural disasters and climate change.

**Strategic outcome 1:** *Households in food-insecure areas of Mozambique are able to maintain access to adequate and nutritious food throughout the year, including in times of shock.*

*Focus area: resilience-building*

*WINGS description: households access nutritious food*

*Alignment to outcome category 1.3: Enhanced social and public-sector capacity to assist populations facing acute, transitory or chronic food insecurity*

1.3.1 Zero Hunger Capacity Scorecard

1.3.2 Emergency Preparedness Capacity Index

1.1.4 Proportion of the population in targeted communities reporting benefits from an enhanced asset base

1.1.5 Food consumption score, disaggregated by sex of household head

1.1.6 Coping strategy index

**Country-specific indicators:**

1. Proportion/number of district officials trained to use food security and nutrition (FSN) district profiles and risk maps.

2. Number of techniques to be used to build sustainable community assets in arid and semi-arid environment

**Assumptions**

i. Government translates the acquired knowledge into policy decision-making in order to meet the basic needs of people during times of crisis.

<b>LOGICAL FRAMEWORK</b>		
<p><b>Output 1.1:</b> People in shock-prone areas benefit from the Government's strengthened capacity to plan and prepare for, respond to and recover from shocks in order to meet their basic needs in times of crisis.</p>	<p>Alignment to output category C: Capacity development and technical support provided</p> <p>C.1 Number of people trained C.2 Number of capacity development activities provided C.3 Number of technical support activities provided</p> <p><b>Country-specific indicators:</b> C.4 Number of people (M/F) trained on FSN, disaster risk reduction (DRR) and common country assessment (CCA)</p>	N/A
<p><b>Output 2.1:</b> Shock-affected people benefit from the Government's strengthened capacity to provide expanded safety-net services in order to meet their basic needs in times of crisis.</p>	<p>Alignment to output category C: Capacity development and technical support provided</p> <p>C.1 Number of people trained C.2 Number of capacity development activities provided C.3 Number of technical support activities provided C.4 Number of training materials developed</p> <p><b>Country-specific indicators:</b> C.5 Number of emergency kits provided to risk-prone communities</p>	N/A
<p><b>Output 2.2:</b> Targeted food-insecure communities benefit from construction and/or rehabilitation of assets that improve food security and build resilience to natural shocks and climate change.</p>	<p>Alignment to output category D: Assets created</p> <p>D.1 Number of assets built, restored or maintained by targeted households and communities, by type and unit of measure</p>	N/A
<p><b>Output 2.3:</b> Targeted households benefit from improved knowledge in nutrition, care practices and healthy diets in order to improve their food consumption and nutritional status.</p>	<p>Alignment to output category E: Advocacy and education provided</p> <p>E.1 Number of targeted caregivers (male and female) receiving three key messages delivered through WFP-supported messaging and counselling E.2 Number of people exposed to WFP-supported nutrition messaging E.3 Number of people receiving WFP-supported nutrition counselling</p>	N/A
<p><b>Output 2.4:</b> Targeted food-insecure communities receive conditional cash- and/or food-based transfers in order to improve their food consumption.</p>	<p>Alignment to output category A: Resources transferred</p> <p>A.1 Number of women, men, boys and girls receiving food/cash-based transfers/commodity vouchers A.2 Quantity of food provided A.3 Total amount of cash transferred to targeted beneficiaries A.5 Quantity of non-food items distributed</p>	N/A

<b>LOGICAL FRAMEWORK</b>		
	A.7 Number of retailers participating in cash-based transfer programmes	
<i>Activity 1: Provide capacity strengthening to prepare for, respond to and recover from weather-related shocks, to the Government at national, sub-national and community levels. WINGS description: government's capacity for weather-related shocks</i>	<i>Alignment to activity category 9: Institutional capacity-strengthening activities</i>	N/A
<i>Activity 2: Provide technical assistance to the Government in making social protection programmes shock-responsive and hunger-sensitive. WINGS description: shock-responsive social protection</i>	<i>Alignment to activity category 9: Institutional capacity-strengthening activities</i>	N/A
<b>Strategic Goal 1</b> <i>Support countries to achieve zero hunger</i>		
<b>Strategic Objective 1</b> <i>End hunger by protecting access to food</i>		
<b>Strategic Result 1</b> <i>Access to food (SDG Target 2.1)</i>		
<b>National SDG targets and indicators:</b> Five-Year Government Plan (PQG) Priority 5, Strategic Objective 5: Reduce communities' vulnerability to natural disasters and climate change		
<b>Strategic outcome 2:</b> <i>Shock-affected people in Mozambique are able to meet their basic food and nutrition needs during and immediately after a crisis. Nutrition-sensitive: yes Focus area: crisis response WINGS description: people meet their food and nutrition needs</i>	<i>Alignment to outcome category 1.1: Maintained/enhanced individual and household access to adequate food</i> 1.1.1 Food consumption score, disaggregated by sex of household head 1.1.2 Coping strategy index 1.1.3 Food expenditure share 1.1.4 Proportion of the population in targeted communities reporting benefits from an enhanced asset base 2.1.6 Food consumption score – nutrition 3.1.1 Proportion of eligible population that participates in programme (coverage) 5.1.4 Moderate acute malnutrition (MAM) treatment performance: recovery, mortality, default and non-response rate <b>Country-specific indicators:</b> 1. Number and percentage of programme participants, who self-report increased access to formal or informal credit as compared to the pre-project baseline assessment	i. WFP secures financial resources to be able to adequately respond during the crisis.

<b>LOGICAL FRAMEWORK</b>		
	<ol style="list-style-type: none"> <li>2. Number and percentage of targeted beneficiaries that have increased their agricultural production since the beginning of the project</li> <li>3. Number and percentage of beneficiaries with own business/self-employed for more than 6 (or, for multi-year programmes, 12) months</li> <li>4. Number and percentage of beneficiaries using skills obtained in a vocational training for income-generation within six months of completion of training</li> <li>5. Number and percentage of programme participants, who self-report increased access to bulking and processing facilities</li> <li>6. Number and percentage of programme participants, who self-report increased access to market information</li> <li>7. Number and percentage of programme participants, who self-report increased access to market information</li> <li>8. Critical gaps in livelihoods infrastructure/facilities identified through this project are integrated into the District Development Plan and the planned EU-funded project on rural infrastructure</li> <li>9. Number of beneficiaries who report feeling satisfied by security levels in and around the location disaggregated by age and gender</li> <li>10. Number and percentage of asylum-seekers/refugees who have been legally naturalized</li> <li>11. Average number of school days per month on which multi-fortified foods or at least four food groups were provided</li> <li>12. Retention rate in WFP-assisted primary schools disaggregated by boys and girls</li> <li>13. Attendance rate in WFP-assisted primary schools disaggregated by boys and girls</li> <li>14. Uptake of nutrition rehabilitation services</li> </ol>	
<p><b>Output 3.1:</b> <i>Shock-affected people receive unconditional cash and/or food-based transfers in order to meet their basic food and nutrition requirements.</i></p>	<p><i>Alignment to output category A: Resources transferred</i></p> <ol style="list-style-type: none"> <li>A.1 Number of women, men, boys and girls receiving food/cash-based transfers/commodity vouchers</li> <li>A.2 Quantity of food provided</li> <li>A.3 Total amount of cash transferred to targeted beneficiaries</li> <li>A.5 Quantity of non-food items distributed</li> </ol>	N/A

**LOGICAL FRAMEWORK**

- A.6 Number of institutional sites assisted  
 A.7 Number of retailers participating in cash-based transfer programmes
- Country-specific indicators:**
1. Financial sector assessment report is presented to the Project Steering Committee
  2. Number of asylum-seekers/refugees who self-report having joined a new savings and loans association during the project period
  3. An economic development committee is established and meets at least three times during the project period
  4. Value chain analysis reports are presented to the Project Steering Committee
  5. Number of seedlings transferred to project beneficiaries from the nurseries
  6. Project beneficiaries are reporting improved access to water
  7. Attendance rate on trainings about improved production and water-saving techniques
  8. Attendance rate on trainings on small business development
  9. USD value of small business start-up asset transfers handed to project beneficiaries
  10. An association/cooperative is formally registered
  11. A fully functional processing and packing unit is set up
  12. Number of local traders who attend the public event
  13. Number of maps produced and disseminated among local stakeholders
  14. Attendance rate at the workshop (vis-à-vis target)
  15. Number of people attending consultation sessions
  16. Mission findings and recommendations presented to the Project Steering Committee
  17. Number of meetings that have taken place with Government officials to discuss naturalization
  18. Number of health units reporting stock outs
  19. Number of people trained on MAM, infant and young child feeding (IYCF), malaria prevention and sanitation

<b>LOGICAL FRAMEWORK</b>		
<b>Output 3.2:</b> <i>Shock-affected malnourished children and pregnant and lactating women receive specialized nutritious foods in order to treat and reduce acute malnutrition rates.</i>	<p><i>Alignment to output category B: Nutritious food provided</i></p> <p>B.1 Quantity of fortified food provided</p> <p>B.2 Quantity of specialized nutritious foods provided</p> <p><i>Alignment to output category A: Resources transferred</i></p> <p>A.1 Number of women, men, boys and girls receiving food/cash-based transfers/commodity vouchers</p>	N/A
<b>Output 3.3:</b> <i>Shock-affected people benefit from improved knowledge on nutrition, care practices and healthy diets in order to improve their nutritional status.</i>	<p><i>Alignment to output category E: Advocacy and education provided</i></p> <p>E.1 Number of targeted caregivers (male and female) receiving three key messages delivered through WFP-supported messaging and counselling</p> <p>E.2 Number of people exposed to WFP-supported nutrition messaging</p> <p>E.3 Number of people receiving WFP-supported nutrition counselling</p>	N/A
<b>Activity 3:</b> <i>Provide cash and/or food transfers to vulnerable households affected by crisis.</i> <i>WINGS description: provision of cash or food to households</i>	<i>Alignment to activity category 1: Unconditional resource transfers to support access to food</i>	N/A

<b>LOGICAL FRAMEWORK</b>		
<b>Strategic Goal 1</b> <i>Support countries to achieve zero hunger</i>		
<b>Strategic Objective 1</b> <i>End hunger by protecting access to food</i>		
<b>Strategic Result 1</b> <i>Everyone has access to food (SDG Target 2.1)</i>		
<b>National SDG targets and indicators:</b> Primary objective of PRONAE, the national school feeding programme: sustainably reduce the negative impact of food insecurity and malnutrition in the education sector		
<p><b>Strategic outcome 3:</b> <i>Children in chronically food-insecure areas have access to nutritious food throughout the year.</i>  <i>Nutrition-sensitive: yes</i>  <i>Focus area: root causes</i>  <i>WINGS description: children have access to nutritious food</i></p>	<p><i>Alignment to outcome category 1.3:</i> Enhanced social and public-sector capacity to assist populations facing acute, transitory or chronic food insecurity  1.3.1 Zero Hunger Capacity Scorecard  <b>Country-specific indicators:</b>  1. Average number of school days per month on which multi-fortified foods or at least four food groups were provided  2. Retention rate in WFP-assisted primary schools disaggregated by boys and girls  3. Attendance rate in WFP-assisted primary schools disaggregated by boys and girls  4. Pass rate in WFP-assisted primary schools disaggregated by boys and girls</p>	<p>i. Government continues to fund home-grown school feeding</p>
<p><b>Output 4.1:</b> <i>Schoolchildren targeted by the national home-grown school feeding programme benefit from improved design, finance and implementation capacity of the Government that helps meet their basic food and nutrition needs and increase school attendance and retention.</i>  <b>SDG 4:</b> <i>Quality education</i></p>	<p><i>Alignment to output category C: Capacity development and technical support provided</i>  C.1 Number of people trained  C.2 Number of capacity development activities provided  C.3 Number of technical support activities provided</p>	<p>N/A</p>
<p><b>Output 4.2:</b> <i>WFP-targeted schoolchildren receive a nutritious meal every day they attend school in order to meet basic food and nutrition needs and increase school attendance and retention.</i>  <b>SDG 4:</b> <i>Quality education</i></p>	<p><i>Alignment to output category A: Resources transferred</i>  A.1 Number of women, men, boys and girls receiving food/cash-based transfers/commodity vouchers  A.2 Quantity of food provided  A.5 Quantity of non-food items distributed  A.6 Number of Institutional sites assisted</p>	<p>N/A</p>

<b>LOGICAL FRAMEWORK</b>		
<b>Output 4.3:</b> Targeted schoolchildren benefit from improved knowledge on nutrition, care practices and healthy diets in order to improve their nutritional status.	Alignment to output category E: Advocacy and education provided E.1 Number of targeted caregivers (male and female) receiving three key messages delivered through WFP-supported messaging and counselling E.2 Number of people exposed to WFP-supported nutrition messaging E.3 Number of people receiving WFP-supported nutrition counselling	N/A
<b>Activity 4:</b> Strengthen the capacity of the government bodies responsible for the national home-grown school feeding programme. <i>WINGS description: provision of cash or food to households</i>	Alignment to activity category 4: School meal activities	N/A
<b>Strategic Goal 1</b> Support countries to achieve zero hunger		
<b>Strategic Objective 2</b> Improve nutrition		
<b>Strategic Result 2</b> No one suffers from malnutrition (SDG Target 2.2)		
<b>National SDGs targets and indicators:</b> Five-Year Government Plan (PQG) Priority 2, Strategic Objective 2: Expand access and improve the quality of health services, reduce maternal mortality, chronic malnutrition, malaria, TB, HIV, and preventable diseases		
<b>Strategic outcome 4:</b> Targeted people in prioritized areas of Mozambique have improved nutrition status in line with national targets by 2021. <i>Focus area: root causes</i> <i>WINGS description: people have improved nutritional status</i>	Alignment to outcome category 2.3: Enhanced social and public-sector capacity to identify, target and assist nutritionally vulnerable populations 1. Zero Hunger Capacity Scorecard <b>Country-specific indicators:</b> 1. Wheat flour for bread produced locally by 7 factories fortified. 2. Percentage of vegetable oil locally produced by 10 refineries fortified. 3. Percentage of sugar produced for local consumption fortified by factories 4. Percentage of maize flour locally produced by 15 large and medium millers fortified	i. Government translates the transferred knowledge to nutrition policies and programmes

<b>LOGICAL FRAMEWORK</b>		
<p><b>Output 5.1:</b> <i>Vulnerable people in Mozambique benefit from strengthened, evidence-based national capacity to combat stunting and micronutrient deficiencies in order to improve their nutritional status.</i></p>	<p><i>Alignment to output category C: Capacity development and technical support provided</i></p> <p>C.1 Number of people trained            C.2 Number of capacity development activities provided            C.3 Number of technical support activities provided</p> <p><b>Country-specific indicators:</b></p> <ol style="list-style-type: none"> <li>1. Number of millers fortifying wheat flour</li> <li>2. Number of eligible companies fortifying oil</li> <li>3. Sugar factories fortifying sugar for domestic consumption</li> <li>4. Medium to large-scale millers fortifying maize meal</li> </ol>	N/A
<p><b>Output 5.2:</b> <i>Vulnerable people in Mozambique benefit from improved knowledge in nutrition, care practices and healthy diets in order to improve their nutrition status.</i></p>	<p><i>Alignment to output category E: Advocacy and education provided</i></p> <p>E.2 <i>Number of people exposed to WFP-supported nutrition messaging</i></p> <p><b>Country-specific outputs:</b></p> <ol style="list-style-type: none"> <li>1. Number of community radio broadcasts, as part of the social and behaviour change communication (SBCC) programme, per year per district</li> <li>2. Average number of new and existing community health workers (at least 50% women) trained (per district), as part of the SBCC programme</li> <li>3. Number of health centres (in the districts supported by the project) receiving support on growth monitoring and promotion and nutrition education from community health workers trained by the SBCC programme</li> </ol>	N/A
<p><b>Activity 5:</b> <i>Provide capacity-strengthening and technical assistance to government entities implementing the national strategy to combat stunting and micronutrient deficiencies.</i></p> <p><i>WINGS description: government capacity for stunting</i></p>	<p><i>Alignment to activity category 6: Malnutrition prevention activities</i></p>	N/A

<b>LOGICAL FRAMEWORK</b>		
<b>Strategic Goal 1</b> <i>Support countries to achieve zero hunger</i>		
<b>Strategic Objective 3</b> <i>Achieve food security</i>		
<b>Strategic Result 3</b> <i>Smallholders have improved food security and nutrition through improved productivity and incomes (SDG target 2.3)</i>		
<b>National SDGs targets and indicators:</b> Five-Year Government Plan (PQG) Priority 2, Strategic Objective 1: Promote the increase of productivity of the agrarian family sector with a view to its greater insertion in the market		
<p><b>Strategic outcome 5:</b> <i>Targeted smallholder farmers in northern and central Mozambique have enhanced livelihoods by 2021.</i></p> <p><i>Nutrition-sensitive: yes</i></p> <p><i>Focus area: root causes</i></p> <p><i>WINGS description: farmers have enhanced livelihoods</i></p>	<p><i>Alignment to outcome category 3.1: Increased smallholder production and sales</i></p> <p>3.1.1 Percentage of male/female smallholder farmers selling through WFP-supported farmer aggregation systems</p> <p>3.1.2 Rate of post-harvest losses</p> <p>3.1.3 Value and volume of pro-smallholder sales through WFP-supported aggregation systems</p> <p>3.1.8 Percentage of targeted smallholder farmers reporting increased production of nutritious crops, disaggregated by sex of smallholder farmer</p> <p><b>Country-specific indicators:</b></p> <p>1. Percentage of food delivered by the farmer organizations that meets WFP standards.</p>	<p>i. Availability of funding to support programme implementation</p>
<p><b>Output 6.1:</b> <i>Targeted smallholder farmers benefit from WFP value chain support in order to improve access to profitable markets and increase their incomes.</i></p>	<p><i>Alignment to output category C: Capacity development and technical support provided</i></p> <p>C.1 Number of people trained</p> <p>C.2 Number of capacity development activities provided</p> <p>C.3 Number of technical support activities provided</p> <p><b>Country-specific indicators:</b></p> <p>1. Number of buying contracts signed between farmers organizations and medium and large buyers</p>	<p>N/A</p>
<p><b>Output 6.2:</b> <i>Targeted smallholder farmer households benefit from improved knowledge in nutrition, care practices and healthy diets in order to improve their nutritional status.</i></p>	<p><i>Alignment to output category E: Advocacy and education provided</i></p> <p>E.2 Number of people exposed to WFP-supported nutrition messaging</p> <p>E.3 Number of people receiving WFP-supported nutrition counselling</p>	<p>N/A</p>

<b>LOGICAL FRAMEWORK</b>		
<b>Activity 6:</b> <i>Enhance the aggregation, marketing and decision-making capacities of smallholder farmers, with focus on women.</i> <i>WINGS description: enhance capacities of smallholder farmers</i>	<i>Alignment to activity category 7: Smallholder agricultural market support activities</i>	N/A
<b>Cross-cutting results</b>		
<b>Cross-cutting result 1:</b> <i>Affected populations are able to hold WFP and partners accountable for meeting their hunger needs in a manner that reflects their views and preferences.</i>	C.1.1. Proportion of assisted people informed about the programme (who is included, what people will receive, length of assistance) C.1.2. Proportion of project activities for which beneficiary feedback is documented, analysed and integrated into programme improvements	
<b>Cross-cutting result 2:</b> <i>Affected population are able to benefit from WFP programmes in a manner that ensures and promotes their safety, dignity and integrity.</i>	C.2.1. Proportion of targeted people accessing assistance without protection challenges	
<b>Cross-cutting result 3:</b> <i>Improved gender equality and women's empowerment among WFP-assisted population.</i>	C.3.1. Proportion of households where women, men, or both women and men make decisions on the use of food/cash/vouchers, disaggregated by transfer modality C.3.2. Proportion of food assistance decision-making entity – committees, boards, teams, etc. – members who are women C.3.3. Type of transfer (food, cash, voucher, no compensation) received by participants in WFP activities, disaggregated by sex and type of activity	
<b>Cross-cutting result 4:</b> Targeted communities benefit from WFP programmes in a manner that does not harm the environment.	C.4.1. Proportion of activities for which environmental risks have been screened and, as required, mitigation actions identified	

**LOGICAL FRAMEWORK**

**Strategic Goal 2** Partner to support implementation of the SDGs

**Strategic Objective 5** Partner for SDG results

**Strategic result 8** Sharing of knowledge, expertise and technology strengthen global partnership support to country efforts to achieve the SDGs (SDG Target 17.16)

**National SDGs targets and indicators:** Five-Year Government Plan (PQG) Priority 2, Strategic Objective 1: Promote the increase of productivity of the agrarian family sector with a view to its greater insertion in the market

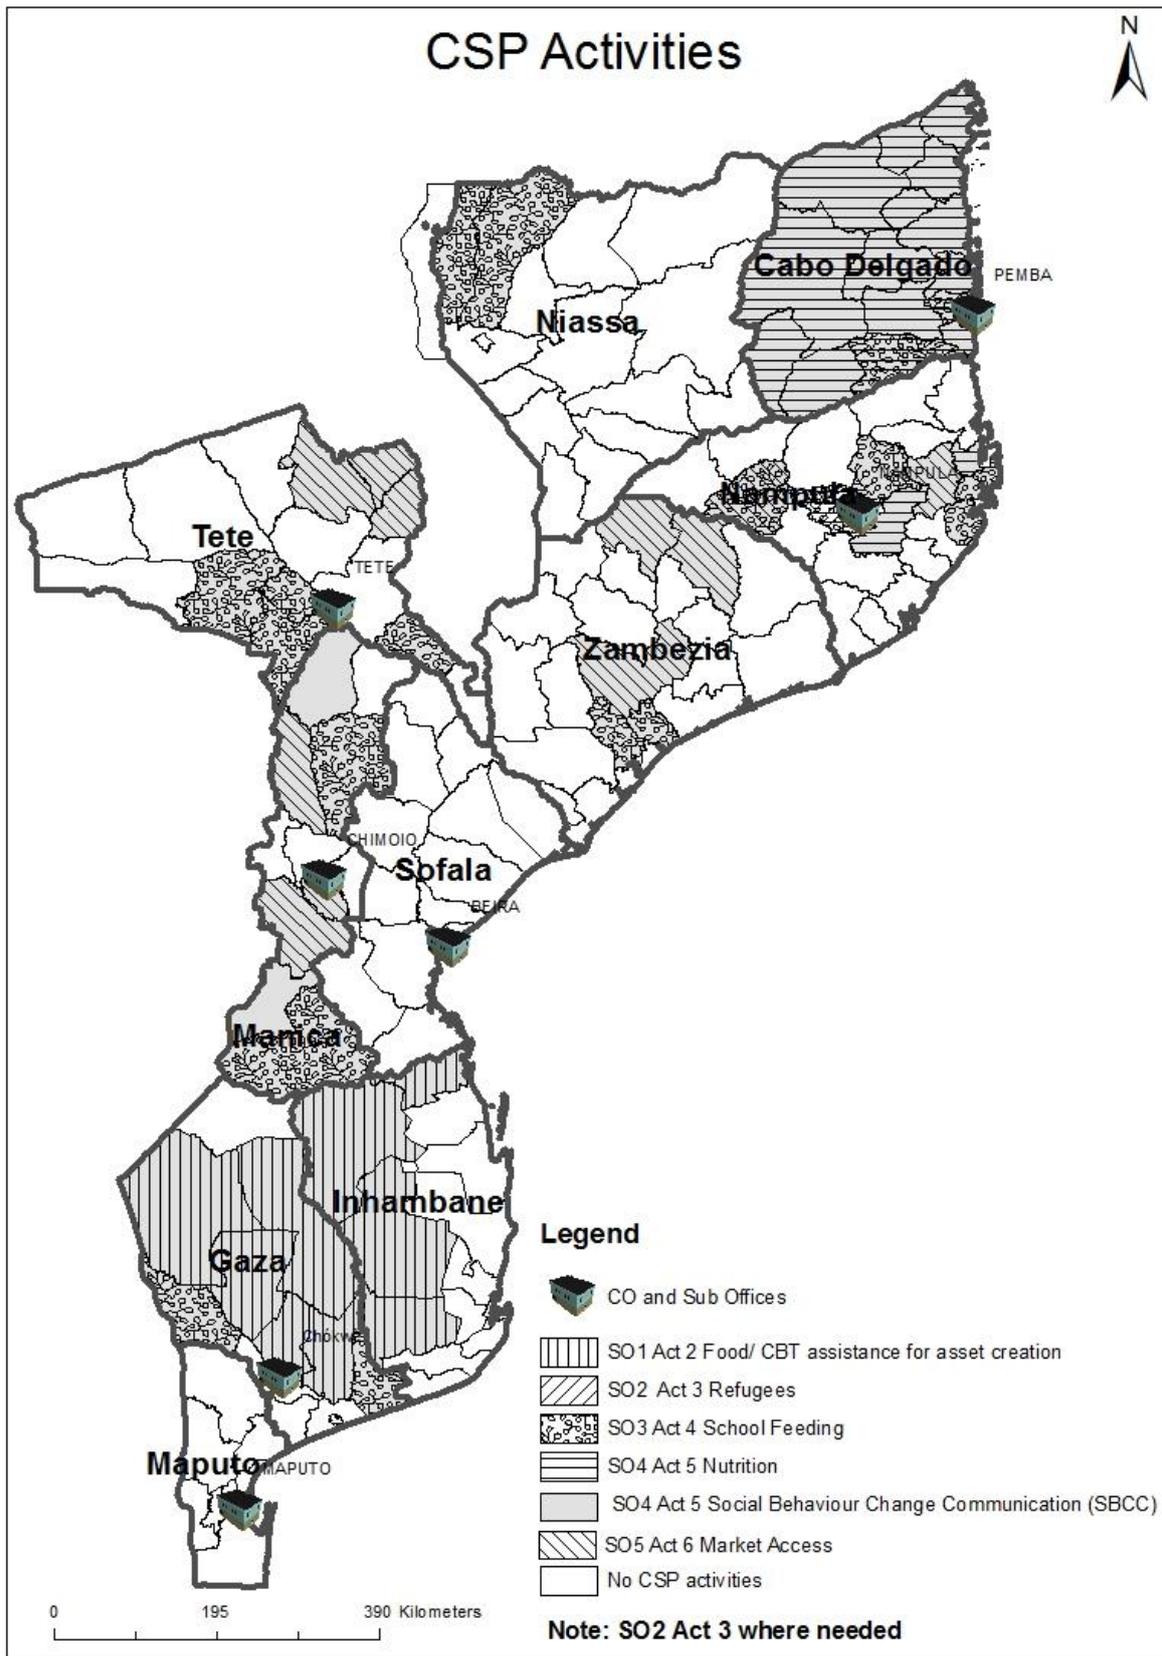

<p><b>Strategic outcome 6:</b> Humanitarian and development partners in Mozambique are reliably supported by efficient and effective supply chain and ICT services and expertise. Focus area: resilience-building WINGS description: partners are supported by WFP expertise</p>	<p>Alignment to outcome category: Enhanced common coordination platforms 8.1.1 User satisfaction rate</p>	<p>i. WFP is able to continuously provide efficient and effective supply chain and ICT services and expertise.</p>
<p><b>Output 7. 1:</b> Vulnerable communities benefit from WFP provision of supply chain and IT services and expertise to the Government and other partners that improves the effectiveness of development and humanitarian programmes.</p>	<p>Alignment to output category H: Shared services and platforms provided H.1 Number of shared services provided, by type H.2 Number of WFP-led clusters operational, by type H.4 Total volume of cargo transported H.5 Percentage of cargo capacity offered against total capacity requested H.6 Percentage of payload delivered against available capacity H.7 Total number of passengers transported H.8 Number of emergency telecoms and information and communications technology (ICT) systems established, by type <b>Country-specific indicators:</b> 1. Corn-soya blend (CSB+) quantity at purchase/storage point and whenever required as per WFP standards segregated by regular programme and emergency response 2. CSB+ quantity delivered at health facility segregated by regular programme and emergency response 3. CSB+ quantity damaged, lost or expired before being delivered to the health facility segregated by regular programme and emergency response</p>	<p>N/A</p>

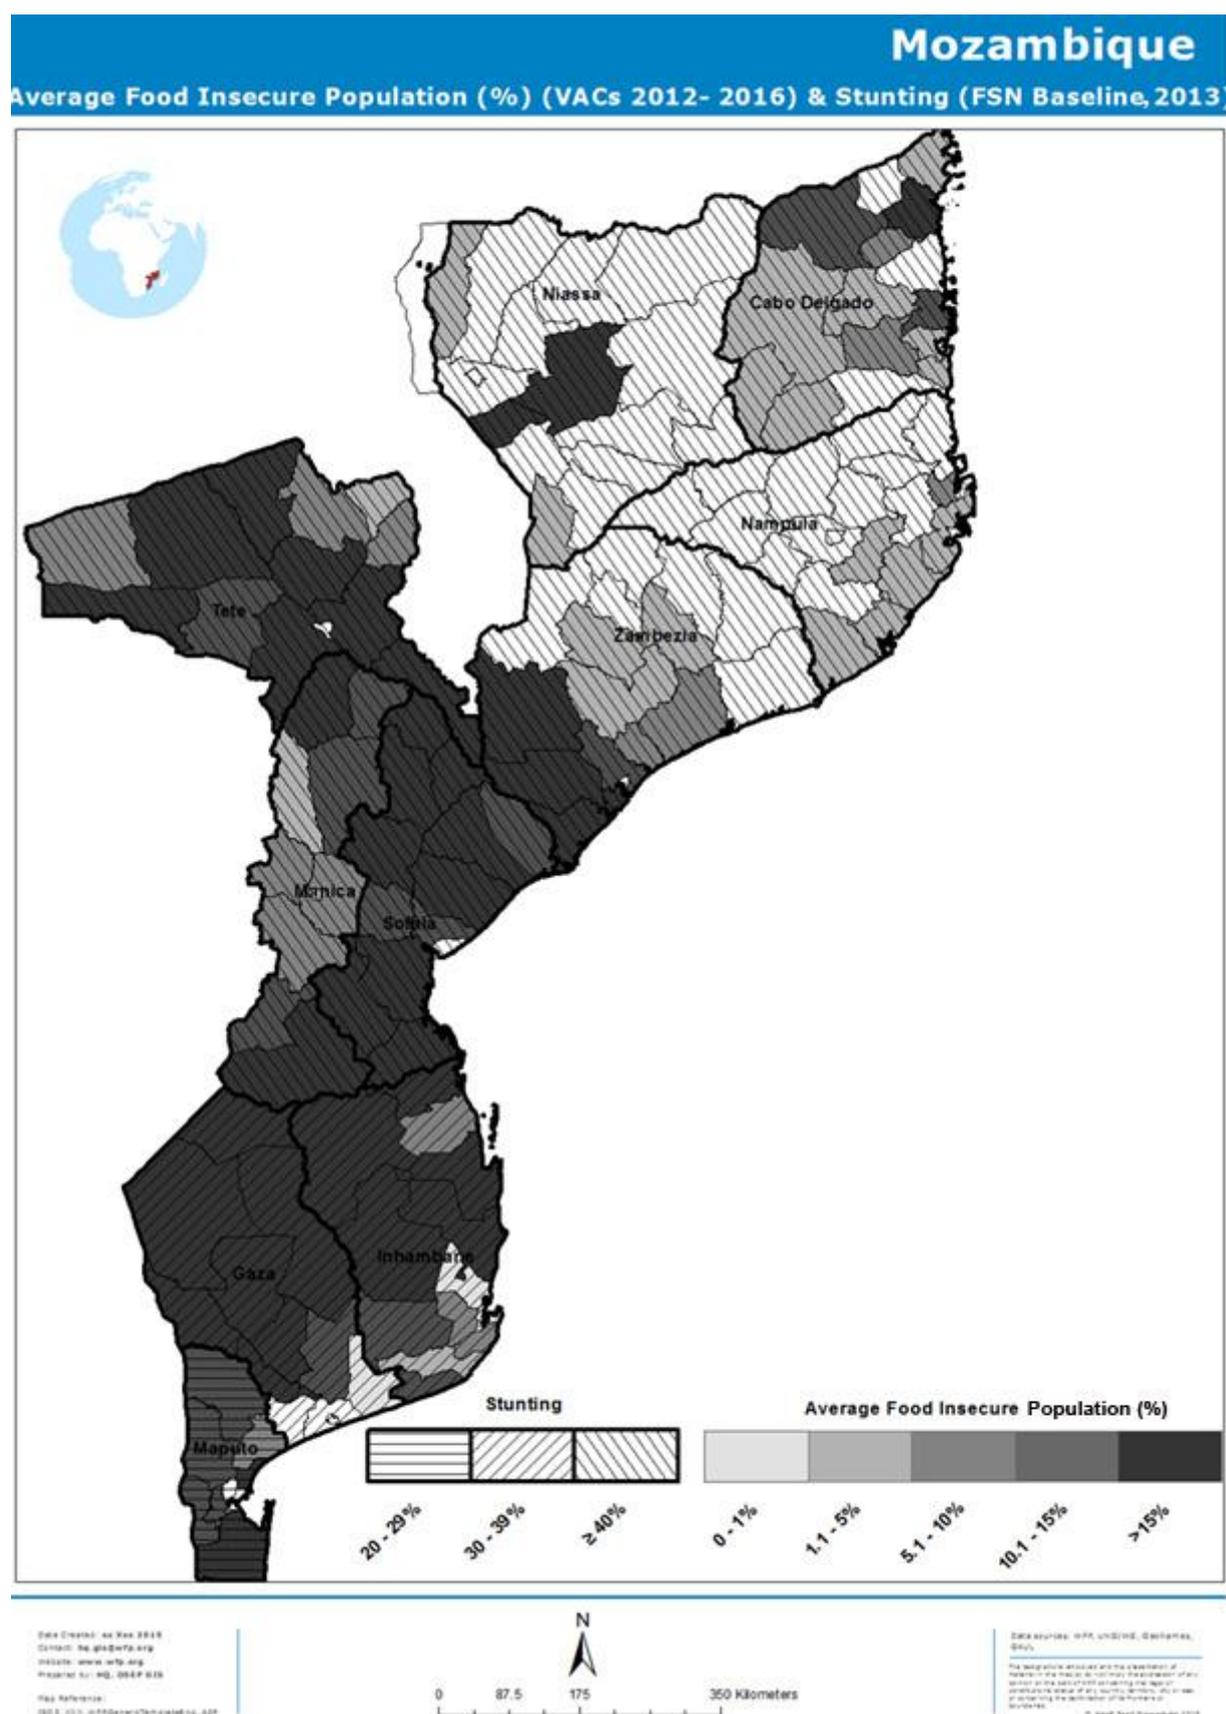

<b>LOGICAL FRAMEWORK</b>		
<i><b>Output 7.2:</b> Vulnerable communities benefit from increased supply chain capacity of the Government and other partners that improves the effectiveness of development and humanitarian programmes.</i>	<p><i>Alignment to output category C: Capacity development and technical support provided</i></p> <p>C.1 Number of people trained</p> <p>C.2 Number of capacity development activities provided</p> <p>C.3 Number of technical support activities provide</p>	N/A
<i><b>Activity 7:</b> Provide supply chain services to humanitarian and development partners. WINGS description: provide supply chain services to partners</i>	<b>Alignment to activity category 10:</b> Service provision and platforms activities	N/A

ANNEX III

The designations employed and the presentation of material in this publication do not imply the expression of any opinion whatsoever on the part of the World Food Programme (WFP) concerning the legal status of any country, territory, city or area or of its frontiers or boundaries.

## Acronyms Used in the Document

CBT	cash-based transfer
CSP	country strategic plan
DHS	Demographic and Health Survey
FAO	Food and Agriculture Organization of the United Nations
FNG	Fill the Nutrient Gap
GAIN	Global Alliance for Improving Nutrition
GDP	gross domestic product
IFAD	International Fund for Agricultural Development
ILO	International Labour Organization
INGC	National Institute for Disaster Management
NGO	non-governmental organization
PASP	Productive Safety Net Programme
PRONAE	National School Feeding Programme
SDG	Sustainable Development Goal
SETSAN	Technical Secretariat for Food and Nutrition Security
SUN	Scaling Up Nutrition
UNDAF	United Nations Development Assistance Framework
UNFPA	United Nations Population Fund
UNHCR	Office of the United Nations High Commissioner for Refugees
UNICEF	United Nations Children's Fund
