HIGHLIGHTS

- Low delivery performance, especially in Amhara, Oromia, and Tigray regions, is mainly due to significant delays in Government-contracted secondary transport to targeted Priority 1 woredas.

- WFP is deploying regional TSF coordinators to all regions to augment the provision and scale-up of the programme nationwide.

- Preparations are underway for the use of mobile health teams to provide TSF services in 18 woredas in Afar and 21 woredas in Somali region. Two pilot woredas has been allocated one month stock that is ready for distribution.

2016 TARGETED SUPPLEMENTARY FEEDING PROGRAMME

The Targeted Supplementary Feeding Programme (TSF) treats children under five years of age, and pregnant and nursing women who are suffering from moderate acute malnutrition (MAM) with Specialized Nutritious Foods (SNF).

PROGRAMME COVERAGE 2016

- **AFAR**: 32 priority 1 woredas, 29 covered
- **AMHARA**: 44, 42
- **OROMIA**: 67, 63
- **SNNPR**: 18, 18
- **SOMALI**: 33, 33
- **TIGRAY**: 20, 19

TOTAL: 219, 209

NOTE: TSF commodity provision to 95 percent of Priority 1 woredas is handled by WFP, with NGOs and the Government of Ethiopia responsible for the remaining woredas.
