Foreword

Emergency preparedness is a critical part of WFP’s efforts to improve its capacity to respond to crises—both natural and man-made. Planning in advance for a major event that could significantly impact our operations allows WFP to more effectively and efficiently use scarce humanitarian resources.

Preparedness is not a plan on a shelf. Rather it should be integrated into WFP operational decision making processes, including project formulation, operational planning and implementation. It should be a holistic process, which encompasses an analysis of the risks facing a country as well as the operational capabilities of the national government, WFP and partners – NGOs, other UN agencies, regional institutions, and many others. There is full recognition that successful preparedness activities need to incorporate the efforts of all these actors to ensure a comprehensive response to the humanitarian challenges looming on the horizon.

As the world in which we operate becomes ever more hazardous, complex and fast paced, the Emergency Preparedness and Response Package offers practical solutions to the immediate problems at hand, building on many years of experience. It also takes these skills and experience to a new level by integrating for the first time contingency planning, risk assessment, business continuity planning and security management. Complex as this integration is, this new tool uses a common sense approach to support the practical implementation of these efforts where they are most important: WFP Country Offices and Regional Bureaux.

We sincerely hope that this new Emergency Preparedness and Response Package will help WFP and partners to even more effectively assist those in need.

Ramiro Lopes da Silva
Deputy Executive Director, Operations Department

## SECTION I

### Introduction

1.1 Why a new guide? 10  
1.2 What’s new? 11  
1.3 What is already in place? 12  
1.4 Why does Emergency Preparedness and Response matter more than ever? 14

## SECTION II

### Emergency Preparedness and Response Package (for Country Offices) 18

**Inter-Agency Level** 22  
2.1 Part I: Risk Assessment 22  
2.1.1 Step One: Risk Identification 24  
2.1.2 Step Two: Risk Ranking 26  
2.1.3 Step Three: Risk Illustration 28  
2.1.4 Step Four: Risk Response 29  
2.1.5 Triggers for stepping up preparedness 30  
2.2 Part II: Emergency Preparedness and Response Checklists 32  
2.2.1 Minimum Preparedness Actions (MPAs) 33  
2.2.2 Emergency Readiness Actions (ERAs) 33  
2.2.3 Concept of Operations Template 37  
2.2.4 Standard Operating Procedures (SOPs) for the First 72-Hour Response 37  
2.3 Supporting Documents and Roles and Responsibilities 38  
2.3.1 The EPRP at Area Office and Sub-Office levels 38  
2.3.2 Roles and Responsibilities 38
2.3.3 Support Tools
   - EPRP web tool
   - E-Learning CD-ROM
   - Electronic EPRP folder

2.3.4 Early Warning Analysis and Crisis Support

SECTION III
The Checklists

3.1 Minimum Preparedness Actions (MPAs)
   - CO Management
   - Human Resources
   - Programme
   - Pipeline
   - Food Procurement
   - Non-Food Procurement
   - Logistics
   - ICT
   - Finance
   - Administration
   - Security
   - Communication
   - Reporting

3.2 Emergency Readiness Actions (ERAs)
   - CO Management

This package is divided into four main sections:

**Section I: Introduction**
This section provides:

- an explanation as to why WFP’s Contingency Planning Guidelines of 2002 have been replaced by the Emergency Preparedness and Response Package;
- a brief overview on what’s new, and a summary of what achievements have been made by WFP in emergency preparedness and response over the past 15 years;
- an analysis of why emergency preparedness and response matter more than ever.

**Section II: WFP’s Emergency Preparedness and Response Package (for Country Offices)**
This section guides Country Offices in conducting a Risk Assessment and explains the purpose and use of the Emergency Preparedness and Response Checklists.

**Section III: Emergency Preparedness and Response Checklists**
This section contains the three, sequentially-linked Emergency Preparedness and Response Checklists:

- Minimum Preparedness Actions
- Emergency Readiness Actions
- Standard Operating Procedures for the First 72-Hour Response

It also provides a template with which to develop a Concept of Operations.

**Section IV: Guidance on Emergency Preparedness and Response in Countries where WFP is not present (for Regional Bureaux).**
The last section provides guidance for Regional Bureaux on how to set up an emergency preparedness mission and a start-up emergency response mission in countries where WFP is not present (oversight countries).
Emergency preparedness is not an end in itself but a process intended to enhance WFP’s emergency response capability. The strongest value of emergency preparedness derives from a shared understanding of operational risks and their likely impact on WFP and its operating environment. Detailed emergency response planning should only be undertaken if a risk is almost certain and is well-defined. In other cases, mainstreaming a minimum level of emergency preparedness is more effective.

1.1 Why a new guide?

1. The Emergency Preparedness and Response Package has been developed following a Strategic Evaluation in 2009 of WFP’s contingency planning. The Evaluation was carried out by a team of senior external evaluators with long-term experience in emergency preparedness and organizational development.

2. The Evaluation found that contingency planning had been exercised at least once in virtually all of WFP’s Country Offices during the period 2002-2008. Where broad participation of staff and partners had been sought, contingency planning had been effective in promoting greater risk awareness, a better understanding of potential response strategies and gaps, and team building and improved coordination within WFP and with partners.

1 WFP defines emergency preparedness as “Actions, arrangements and procedures in anticipation of an emergency to ensure that the response, when needed, be rapid, appropriate and effective.” (Source: WFP’s Programme Guidance Manual)

3. Notwithstanding these accrued benefits, the effectiveness of WFP’s contingency planning in contributing towards emergency preparedness and response at the field level was found to be rather limited. While much time had been devoted to detailed scenario development, too little emphasis had been placed on concrete preparedness-enhancing actions, such as the pre-positioning of stocks, logistical arrangements, improved access to sources of information, and pre-approved agreements with partners or authorities. Linkages to other preparedness-enhancing processes within WFP had been rather limited, leading to a duplication of work.

4. The Strategic Evaluation made the following recommendations which were endorsed by WFP Management at the October 2009 Executive Board meeting:3
   i. Re-conceptualize contingency planning from a stand-alone operational planning activity to an element in an integrated strategic problem-solving process conducted within an overall inter-agency framework.
   ii. Reaffirm and consolidate commitment to and support and accountability for emergency preparedness, including contingency planning, as and when appropriate.
   iii. Build on field experience and initiatives to update the guidance material and develop skills while institutionalizing the revised approach.

1.2 What’s new?

5. The Emergency Preparedness and Response Package builds on the findings and recommendations of the Strategic Evaluation, and follows extensive consultations with Regional Bureaux, Country Offices and relevant technical divisions in WFP Headquarters. It takes into account peer reviews, approaches to emergency preparedness as developed by partner UN agencies, and international standards.4

---

6. The Package is WFP’s toolbox for enhancing emergency preparedness and response capabilities at the field level. As such, it replaces WFP’s Contingency Planning Guidelines that were adopted in 2002. It is based on WFP’s Emergency Preparedness and Response Framework, which outlines the organization’s corporate policy, methods and procedures for establishing sufficient preparedness levels at all times.

7. The Package builds on the experience and expertise gathered by WFP and its partners in contingency planning, business continuity and pandemic planning. It creates linkages with other planning processes and frameworks, at both internal and inter-agency levels. These include Country Offices’ Annual Performance Plans, WFP’s corporate Risk Management Framework and Security Management Policy, Inter-Agency Contingency Planning and the Global Humanitarian Cluster Approach.\(^5\)

8. The Package equips WFP Country Offices with the tools they will need during the Country Office Annual Performance Plan to conduct a Risk Assessment and to mainstream a minimum level of preparedness throughout all functional areas. When a specific risk becomes more imminent, Country Offices can use the Package’s recommended Emergency Readiness Actions to help them step up their readiness level. In case of an emergency, the Package also provides guidance as to how to respond during the first 72 hours of a disaster.

9. Implementation of the Emergency Preparedness and Response Package requires the involvement of all functional units in WFP Country, Area and Sub-Offices. Country Office Management is to lead the process. As a management tool, the Package provides a framework for accountability and resourcing for emergency preparedness.

1.3 **What is already in place?**

10. WFP’s 1994 Mission Statement identifies disaster prevention, preparedness and mitigation as priority areas for the organization. Since the Mission Statement was published, WFP has championed a number of ground-breaking initiatives:

---

\(^5\) Please refer to Annexes 1-4 for more information on each of these processes and frameworks.
• establishment of the Augmented Logistics Intervention Team for Emergencies, ALITE (1995);

• stand-by agreements with 18 government agencies, NGOs and commercial companies (starting 1995);

• launch of the Fast Information Technology and Telecommunications Emergency and Support Team (FITTEST) (1998);

• establishment of the first United Nations Humanitarian Response Depot (UNHRD) in Brindisi, Italy (2000), and then four more in Dubai, Ghana, Malaysia and Panama;

• roll-out of emergency preparedness and response trainings (2001);

• establishment of the Field and Emergency Support Office (FESO) in Dubai (2001);

• launch of Contingency Planning Guidelines6 and the Emergency Preparedness Web (EPweb) (2002);

• partnership established with the Turin-based Information Technology for Humanitarian Assistance Cooperation and Action (ITHACA) to jointly develop IT products and services (2006);

• launch of the joint, biannual WFP/UNICEF IT Emergency Management Training (2007);

• collaboration established with the European Union Emergency Response Services to access satellite imagery for emergency preparedness and response (2009);

• launch of WFP’s global online learning course “Getting Ready for Emergencies” (2009); and

• roll-out of the “Readiness Initiative” (Bangkok 2010), the latest in a series of inter-agency simulation exercises carried out at regional level since 2007.

11. At the inter-agency level, WFP was appointed co-chair of the Inter-Agency Standing Committee (IASC) Sub-Working Group on Preparedness in 2001. In this role, and in the same year, WFP facilitated the collective development of early warning tools and the launch of the IASC Contingency

Planning Guidelines. In 2005, WFP became the Global Cluster Lead in Logistics and in Emergency Telecommunications. In December 2010, WFP assumed co-lead responsibilities for the Global Food Security Cluster. At the field level, WFP has led the Disaster Management Team in a number of complex emergencies.

1.4 Why does Emergency Preparedness and Response matter more than ever?

12. Food assistance needs have increased significantly since 2007/8 and, as a result, WFP beneficiary figures have risen. In order to formulate comprehensive preparedness and response strategies to the growing humanitarian challenges, the organization has been obliged to continually improve preparedness and to work more closely with partners in the UN system and with national governments, regional institutions, the NGO community and research centres.

Figure 1. WFP’s Relief Beneficiaries versus WFP’s Overall Beneficiaries 2006-2009

13. Between 2005 and 2010, WFP invested more than US$40 million in country-specific emergency preparedness and response activities. This investment was funded by the Immediate Response Account for countries struck by a crisis or disaster. During the same period WFP declared twelve corporate emergencies. Another nine emergency operations required extensive corporate support from WFP, with regular Task Force meetings and international staff deployment. WFP’s portfolio grew significantly, as did the proportion of WFP’s programme of work allocated towards relief.

14. The growing humanitarian challenges have had an impact on the livelihoods of local populations and on WFP. Natural and man-made disasters have also taken their toll. In 2010, WFP staff and assets were severely affected by Haiti’s earthquake: one colleague lost her life, several were injured and nearly all struggled to cope with the deaths and injuries of family members and friends. WFP facilities and assets were badly damaged, forcing staff to relocate within the capital Port-au-Prince almost overnight.

---

8 2008 and 2009 expenses are according to IPSAS, while 2006 and 2007 values are based on UNSAS.
15. Armed conflict, civil unrest, terrorism and crime have become major threats to WFP and the whole UN system. Working on the frontlines, WFP colleagues and partners are exposed to the “trend [...] of a lack of respect for the emblems and efforts of humanitarian organizations [which has] continued unabated.”9 This has led to politically- and criminally-motivated targeting of humanitarian workers and to their increased vulnerability.

16. The increasingly hazardous environment in which WFP operates has obliged the organization to move beyond the traditional way of doing contingency planning. Risk management, business continuity and security management issues must now be incorporated into the preparedness process.

Working under a (Semi-)Remote Control Set-up

In situations of heightened insecurity, WFP may have to relocate staff and offices within the country, or outside, and switch to a (semi-)remote control implementation mode. This transition can happen suddenly and without warning, and its effects on staff and on operations may be protracted. WFP emergency preparedness planning needs to consider the rapid lock-down or closure of offices, destruction of sensitive documentation (electronic and hard copies), and relocation/evacuation of national and international staff. It also needs to identify options for WFP to maintain operational capability through partners, including NGOs, local authorities and/or commercial entities.

Since 2007 in Afghanistan, and later in Somalia, WFP has made extensive use of third parties to ensure that work carried out by its partners continues to be independently monitored. For this type of arrangement an NGO or for-profit consulting firm is selected to carry out the role of Food Monitor. This third-party contractor is completely removed from any aspect of programme design and implementation. They are trained by WFP and focus exclusively on assessments, distribution and post-distribution monitoring. Contractual arrangements of this type must include a degree of flexibility so that monitoring activities can be extended to new geographical areas if such an expansion is necessitated by WFP’s programme requirements and developments in the security situation.

---

Emergency preparedness is not a stand-alone, one-off activity. Instead, it is a process that is developed and adapted alongside and according to a country’s risk profile, the humanitarian situation on the ground and the operational capability of WFP and its partners, including the national government.

17. The Emergency Preparedness and Response Package consists of two, sequentially-linked parts that are to be implemented by WFP Country Offices in coordination with their respective Area Office and/or Sub-Office:

**Part I:** Risk Assessment (Section 2.1)

**Part II:** Emergency Preparedness and Response Checklists (Section 2.2)
Figure 3. WFP’s Emergency Preparedness and Response Package
18. The objectives of the Emergency Preparedness and Response Package are to:

i. provide a practical framework for Country Offices to continually improve their preparedness and response;
ii. forge a common understanding of potential risks and the impact that those risks might have on WFP’s internal and external environment;
iii. establish and mainstream a standard for minimum emergency preparedness at Country Office level;
iv. guide Country Offices as a risk becomes more imminent, and help them raise their emergency readiness level;
v. allow Country Offices to maintain resilience and to recover quickly from any disruptions and crisis events;
vi. enable Country Offices to scale up their operational response capability so that they can adequately address food assistance needs among affected populations, and effectively assume their cluster-lead responsibilities;
vii. guide Country Offices in their initial emergency response;
viii. strengthen WFP in advance of a crisis or disaster by enabling the organization to position itself vis-à-vis government and partner agencies.

19. The Package requires the participation of all functional units in WFP Country, Area and Sub-Offices. **The Country Director (CD) has ultimate responsibility for the progressive adoption of the Package.** The Regional Bureaux and the Emergency Preparedness and Response Branch (ODEP) assume an advisory and technical support role in this process. Regional Bureaux are also tasked with identifying priority countries where WFP is not present and, in those countries, ensuring a minimum level of emergency preparedness.¹⁰

---

¹⁰ Please refer to Section IV “WFP’s Emergency Preparedness and Response in Countries where WFP is not present”.
**Emergency Preparedness: its definition and objectives**

WFP defines emergency preparedness as “actions, arrangements and procedures in anticipation of an emergency to ensure that response, when needed, be rapid, appropriate and effective”.¹¹ The Emergency Preparedness and Response Package (EPRP) provides guidance for Country Offices to implement a set of actions that address both WFP’s internal and external environment.

**Internal environment**

WFP’s programmes, processes, staff and assets

In this context the EPR actions are designed to:

- protect the Country Office and its programmes against the negative impact of a crisis or disaster;
- allow the Country Office to maintain resilience and recover fast from any disruptions which may have compromised its functioning; and
- enable the Country Office to scale up its operational response capability with due attention to staff health and safety issues.

**External environment**

Population, Food Security Situation, Infrastructure and Partnership Networks

In this context the EPR actions are designed to enable WFP to:

- quickly and adequately address food and nutrition security needs among the population affected by the crisis or disaster;
- effectively carry out cluster-lead responsibilities; and
- position the organization in advance of a crisis or disaster vis-à-vis government and partner agencies.

¹¹ WFP Programme Guidance Manual — Emergency Preparedness
Inter-Agency Level

20. The EPRP does not substitute for Inter-Agency Emergency (IA) Preparedness and Contingency Planning. Roles and responsibilities assigned to and accepted by WFP at IA level need to become specific preparedness actions within the relevant EPR process to ensure that WFP maintains the capacity necessary to carry out its IA responsibilities.

21. The methodology suggested by the EPRP, which combines Contingency Planning, Business Continuity and Pandemic Planning as well as Risk Management, is increasingly being adopted by other UN agencies. It has been introduced to the Inter-Agency Standing Committee (IASC) Sub-Working Group on Preparedness and contributed significantly to the new methodology used in the revision of the IA Contingency Planning Guidelines which is due to be concluded by the end of 2012.

2.1 Part I: Risk Assessment

Risk Management is a structured process which enables the user to identify and assess risks, and to establish measures or controls with which to respond to them. In this context, it is geared towards anticipating risks to which WFP and beneficiaries may be exposed, and towards preventing those risks from reducing WFP’s capacity to effectively fulfil its mandate.

22. In 2010, the WFP Division for Performance and Accountability Management (RMP) identified lack of preparedness to respond to heightened humanitarian food assistance needs and lack of preparedness to maintain business continuity in the event of a disaster as being key operational risks for the organization.

23. While the exact timing of a disaster cannot be predicted, understanding the likely impact of disasters on WFP’s internal and external environment will help WFP Country Offices undertake minimum preparedness and adequate emergency readiness actions.
24. Risk Assessment is the first component of WFP’s Emergency Preparedness and Response Package and is a mandatory part of the Annual Performance Plan for all Country Offices. The Assessment is based on RMP’s Risk Profiling Methodology. It is structured into four steps:

   **Step One:** Risk Identification
   **Step Two:** Risk Ranking
   **Step Three:** Risk Illustration
   **Step Four:** Risk Response

Risk is the possibility that an event will occur that will affect the achievement of WFP’s objectives and mandate.

25. Country Offices are the owners of their Risk Assessment. For the purposes of developing a Risk Profile for their country they are advised to consult with UN agencies, partners, the Red Cross and Red Crescent Movement, research institutes\(^{12}\) and — where feasible — with the national authorities. These consultations will enable WFP to gather a variety of information, insights and views, to harmonize and link up with preparedness approaches of partners, and to gain a better understanding of response capabilities on the ground. National authorities may have data and monitoring systems in place to assess the risk of natural disasters. Similarly, WFP can assist those with whom they consult by acting as a source of risk-related information through WFP’s Early Warning and other monitoring systems.

26. The Risk Assessment will consider the Threat and Vulnerability Assessment as carried out by the Security Management Team (SMT).

27. The Risk Assessment should be a consultative process in which different opinions are brought together. It should be carried out taking into consideration all possible cross-cutting issues that may arise in a given context. These may include protection\(^{13}\), gender, and HIV and AIDS. Responsibility for validation of the resulting Risk Assessment lies with the Country Director.

---

12 National, regional and international scientific bodies, such as seismologic institutes and organizations, have the capacity to support WFP in disaster modelling.

2.1.1 Step One: Risk Identification

28. Within WFP, risks are defined within three major categories: contextual, programmatic and institutional.

**Figure 4. Risk Categories**

**Contextual Risk:**
Risk of state failure, return to conflict, development failure and humanitarian crisis. Factors that WFP is affected by, but over which we have very little control.

**Programmatic Risk:**
Risk of not reaching our programme objective or of potentially causing harm to others — for instance, by drawing beneficiaries into a conflict zone or by hurting fragile economies with aid.

**Institutional Risk:**
Risks with significant implications for WFP, such as security issues, reputational loss, and financial losses through corruption. These can affect WFP as an institution, and could compromise our ability to reach people in need.

29. **Contextual risks** are found in the broad settings in which WFP operates. They can include political and social risk factors such as intensified conflict, political instability and natural and climatic hazards. Generally, these contextual risks are beyond the control of humanitarian actors and cannot be prevented. However, they can be predicted and mitigated.

30. **Programmatic risks** can be grouped into two main areas: the risk of failing to achieve programme objectives, and the potential to cause harm to others. Risks associated with possible programme failure include setting overly ambitious objectives, using untested programme approaches, and basing programmes on flawed needs assessment. The second area covers a range of risks that may result in WFP interventions inadvertently having a negative effect. WFP’s Do No Harm approach attempts to eliminate or minimise these risks.
31. **Institutional risks** are internal to WFP but would have implications beyond the organization. They include fiduciary and corruption risks, and potential funding deficits and reputational loss.

32. When identifying risks, the Country Office must look at all risks that it might face and group them within the three categories as being **contextual, programmatic** and/or **institutional**. As shown in Figure 4, programmatic risks may arise as a result of risks — or as a consequence of responses to risks — in either of the other two categories. Likewise, institutional risks may arise as a result of — or as a consequence of the response to programmatic risks.

33. **The EPRP focuses on mitigating the effects of contextual risks that impact on ongoing operations or give rise to a need to launch new ones. These contextual risks can be divided into the following types:**
   - natural hazards, such as earthquakes and pandemics, and extreme seasonal weather events that cause floods, landslides or droughts;
   - armed conflict and civil unrest;
   - restrictive government legislation, such as export and import bans;
   - drastic changes in the socio-economic environment, such as a surge in prices of essential goods;
   - terrorism and crime.

34. When risks are identified it is important to be as specific as possible when describing them so that they can be monitored (see section 2.1.5 on Triggers). If, for example, one of the identified risks is conflict then it needs to be clearly noted who the potential belligerents are, in which part of the country they could clash, and what main factors underlie the risk of violence.
2.1.2 Step Two: Risk Ranking

35. Once a Country Office has identified the most prominent risks, it needs to score them separately for each category by their perceived impact and likelihood of occurrence. In doing so, risks are ranked on a scale of 1 to 3. Multiplying these two variables will give a value that will indicate the seriousness — low, medium or high — of a given risk (see Figure 5). Table 1, below, provides guidance on how to assess impact and likelihood, and how to rate the level of seriousness.

Table 1. Components of Risk Ranking

<table>
<thead>
<tr>
<th>Impact</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Negligible (1)</td>
<td>WFP is still able to carry out its operations, with almost no delays/losses. Heightened food assistance needs and cluster-lead responsibilities can be addressed through minimal investment in on-going operations. National response capabilities and those of in-country stakeholders are high. Minimal impact on staff and assets.</td>
</tr>
<tr>
<td>Minor (2)</td>
<td>WFP is still able to carry out its operations, though with some delays/losses. Heightened food assistance needs and cluster-lead responsibilities can be addressed through minor investment in on-going operations. National response capabilities and those of in-country stakeholders are fairly high. Minor impact on staff and assets.</td>
</tr>
<tr>
<td>Moderate (3)</td>
<td>Programme delivery may be hampered. Additional resources and activities within ongoing operations and cluster-lead responsibilities will be required to attend to system disruptions and heightened humanitarian needs. National response capabilities and those of in-country stakeholders are medium. Some impact on staff and assets.</td>
</tr>
<tr>
<td>Severe (4)</td>
<td>Programme delivery will significantly be hampered. Substantial additional resources and activities within ongoing operations and cluster-lead responsibilities will be required to attend to system disruptions and heightened humanitarian needs. National response capabilities and those of in-country stakeholders are low. Considerable impact on staff and assets.</td>
</tr>
<tr>
<td>Critical (5)</td>
<td>WFP activities could be blocked. The event may require a massive WFP response. National response capabilities and those of in-country stakeholders are extremely low. Critical impact on staff and assets.</td>
</tr>
<tr>
<td>Likelihood</td>
<td>Seriousness</td>
</tr>
<tr>
<td>-------------------------</td>
<td>-----------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Very unlikely (1)</strong></td>
<td>The seriousness rating is the multiplication of the impact risk ranking with the likelihood risk</td>
</tr>
<tr>
<td>The event has a remote chance of arising — up to a 20 percent chance within the current year — and/or has occurred very infrequently, if ever, in the past.</td>
<td></td>
</tr>
<tr>
<td><strong>Unlikely (2)</strong></td>
<td>Low Average Score: 1–7</td>
</tr>
<tr>
<td>The event has a low chance of arising — between a 20 and 40 percent chance within the current year — or has occurred a couple of times in the past.</td>
<td></td>
</tr>
<tr>
<td><strong>Moderately likely (3)</strong></td>
<td>Medium Average Score: 8-14</td>
</tr>
<tr>
<td>The event has a possible chance of arising — between a 40 and 60 percent chance within the current year — or has occurred a few times in the past.</td>
<td></td>
</tr>
<tr>
<td><strong>Likely (4)</strong></td>
<td>High Average Score: 15-25</td>
</tr>
<tr>
<td>The event has a probable chance of arising — between a 60 and 80 percent chance within the current year — or has occurred several times in the past.</td>
<td></td>
</tr>
<tr>
<td><strong>Very likely (5)</strong></td>
<td></td>
</tr>
<tr>
<td>The event has a significant chance of arising — over 80 percent chance within the current year — or has occurred frequently in the past.</td>
<td></td>
</tr>
</tbody>
</table>
2.1.3 Step Three: Illustration

36. Once a Country Office has ranked its risks, it should illustrate on a **Risk Graph** the contextual risks for which the EPRP provides mitigation actions. The Risk Graph helps the Country Office visualize its Risk Profile. It draws attention to those risks whose seriousness levels rank in the medium/high range and which require Mitigating Actions beyond the Minimum Preparedness Actions.

![Figure 5. Risk Graph](image)

**Likelihood**

- **High Seriousness** (15-25) Emergency Readiness Actions (ERAs)
- **Medium Seriousness** (8-14) Early Warning (EW)
- **Low Seriousness** (1-7) Minimum Preparedness Actions (MPAs)
2.1.4 Step Four: Risk Response

37. Having illustrated its risks, the Country Office should record them, by category, in a Risk Register. The Register consists of two parts: risk assessment and mitigation actions, indicating which risk response strategy should be applied and which mitigating actions should be put in place:

- **Accept** the risk, as it is;
- **Control** the risk through mitigation actions;
- **Avoid** the risk by temporarily halting WFP activities and stepping up monitoring activities; or
- **Transfer** the risk by operating through partners on a (semi-)remote control basis (as in Afghanistan and Somalia).

(This sequence gives rise to the mnemonic **ACAT**.)

38. The EPRP is designed to assist Country Offices in controlling/mitigating the effects of the contextual risks identified.

39. Country Directors are advised to escalate a risk alert to Regional Bureau level, if:

- the risk might impact on neighbouring countries;
- managing the risk requires capacities and resources beyond those available at Country Office level.

40. In their ongoing operations, Country Offices need to make adequate budgetary provisions for the implementation of both the Minimum Preparedness Actions and most of the Emergency Readiness Actions (as applicable). With sufficient justification, additional corporate resources can be requested from the Immediate Response Account and the Working Capital Financing Facility for the purposes of conducting assessments and disaster simulation exercises, and for pre-positioning food under the Emergency Readiness Actions.
2.1.5 Triggers for stepping up preparedness

41. Risk monitoring is an important part of the risk management process. Through their respective positions staff already monitor, in a general sense, important developments in the country. The EPRP focuses on specifics, i.e. critical indicators that need to be monitored in relation to risks that have been identified. Individually and/or collectively, these indicators need to be analysed for tipping points that will act as triggers for decision-making. Monitoring these critical indicators will enable the Country Office to decide whether it has reached a threshold that requires it to increase its preparedness level from Minimum Preparedness Actions (MPAs) to Emergency Response Actions (ERAs). For each contextual risk, the Country Office should identify those thresholds through a discussion process based on the following question:

*What has to happen to make it necessary to step up the Country Office’s preparedness level by implementing the Emergency Readiness Actions?*

42. **The final decision on when to implement the ERAs is taken by the Country Director.** The critical indicators — agreed upon by the Country Office — establish clear threshold levels that indicate when a risk is becoming significantly more imminent and, in so doing, support this decision-making process.

43. To enable them to monitor the identified risks more closely, the Country Office should consider asking for support from the Early Warning structures in Regional Bureaux and Headquarters.

---

15 Example: the risk is flood. A possible critical indicator might be: the water level in river $x$. In this case the trigger would be: the level of water in river $x$ exceeds $y$ cm.

1
2.2 Part II: Emergency Preparedness and Response Checklists

44. The Emergency Preparedness and Response Checklists form the second part of the Package. The checklists employ a holistic approach, integrating security management, business continuity, IT disaster recovery and contingency planning. Each checklist has a specific function at a specific point during the evolution of a risk. Thus, the checklists are not to be adopted simultaneously:

<table>
<thead>
<tr>
<th>No.</th>
<th>Type of Checklist</th>
<th>Timeframe for Adoption</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Minimum Preparedness Actions (MPAs)</td>
<td>As part of the Country Office Annual Performance Plan and Mid-Year Performance Review.</td>
</tr>
<tr>
<td>2</td>
<td>Emergency Readiness Actions (ERAs) including CONOPS template</td>
<td>As a specific risk becomes imminent that will have medium/high-impact on a Country Office, its programmes, processes and the operating environment.</td>
</tr>
<tr>
<td>3</td>
<td>Standard Operating Procedures for the First 72-Hour Response (SOPs)</td>
<td>Upon outbreak of a disaster or crisis.</td>
</tr>
</tbody>
</table>

45. Some of the preparedness and readiness actions need to be addressed by the Country Office Management directly. Others need to be addressed by individual functional units, facilitated by an EPR Focal Point who has been identified by the Country Office Management. Several actions may already have been initiated or completed as part of the regular work process. Others, such as data-gathering and mapping, may be carried out and provided by or through partners. Where there are gaps, these should be addressed through individual preparedness actions in the Annual Performance Plan and in the Work Plan of relevant staff. Country Offices can add more actions if deemed necessary in the context of their specific operating environment.
46. **Final responsibility and accountability for the Package lies with the Country Director** who must sign off on the MPAs, ERAs and SOPs and any updates.

### 2.2.1 Minimum Preparedness Actions (MPAs)

47. Minimum Preparedness Actions (MPAs) represent the first checklist that a County Office must implement in order to mainstream a minimum level of emergency preparedness throughout all functional areas. The MPAs are based on a multi-hazard approach. While they do take into account the risk profile established for a Country Office, they are not risk-specific.

48. The objectives of the MPAs are to:

   - establish a standard of minimum emergency preparedness for which Country Offices can be held accountable;
   - facilitate a rapid build-up of emergency readiness, should a risk become imminent; and
   - buffer against the negative impacts of an unexpected, sudden-onset disaster.

49. The progress of MPA implementation shall be reviewed on a six-monthly basis by the Country Office Management as part of the Country Office Annual Performance Plan and the Mid-Year Performance Review, and/or according to the seasonal hazard calendar.

### 2.2.2 Emergency Readiness Actions (ERAs)

50. Emergency Readiness Actions (ERAs) represent the second checklist which will be acted upon when a risk becomes imminent or when a high-impact, sudden-onset event, such as an earthquake in a densely populated area, is anticipated. The term “Emergency Readiness Actions” is used to indicate actions that will bring the Country Office to an advanced level of readiness to respond to a specific risk.

51. Unlike the MPAs, the ERAs are risk-specific. They build on the MPAs already in place and include a set of questions and concrete actions that will enable the Country Office to augment its emergency response capability and
to develop a Concept of Operations (CONOPS). Most particularly at this stage, Country Offices are strongly advised to align their emergency preparedness strategies with those carried out at the inter-agency and cluster levels.

The purpose of the EPRP’s Guidance Questions

Before ERAs are implemented, the Country Office should assess the impact of the anticipated disaster on WFP’s operation and beneficiaries in more detail. For this purpose, the EPRP contains boxes that precede the ERA checklist for each unit, which provide lists of guidance questions relating to the scope and context of the anticipated scenario. Before the unit’s ERA template is filled out these questions should be used as bases for discussion within the unit. They are structured in a way that will gather essential background information and help to identify special requirements and operational constraints. It is important that these issues are considered so that an adequate preparedness level for potential disaster situations can be established. The questions, especially those for Country Office Management, are designed to be used as reference points in case the Country Office decides to draft a Concept of Operations (CONOPS).  

52. In cases of slow-onset or recurring emergencies, such as droughts or hurricanes, monitoring through early warning systems and seasonal timing will be critical in determining when to implement the ERAs. Monitoring, analysis and early warning can also provide valuable advance notice of impending conflict-related emergencies and, in so doing, maximise the impact of the ERAs. In the case of sudden-onset emergencies, such as earthquakes, there may be only very limited time — or none at all — to put the ERAs in place. In such emergencies, the MPAs and other preparedness-enhancing efforts adopted at Country Office, Regional Bureaux and Headquarters will act as critical buffers that help the Country Office to maintain resilience.

53. Stepping up preparedness from minimum preparedness to an emergency readiness level is closely connected to monitoring the triggers, identified by

---

16 For the Concept of Operations template please refer to section 3.4.
17 Please refer to the Emergency Preparedness and Response Framework.
the Country Office team during the risk assessment. **The decision as to when to implement the ERAs lies ultimately with the Country Director** and will follow consultation with partners in-country and the Regional Bureau. Regional Directors may determine the need to involve Headquarters units. Early warning analysis may support the Country Director in making this decision.

54. The objectives of the ERAs are to:

- step up the Country Office’s emergency preparedness level, in view of an imminent risk, to one of emergency readiness;
- guide the Country Office in identifying elements that are essential for drafting a Concept of Operations\(^\text{18}\), and obtaining information critical to inter-agency appeals such as the Central Emergency Response Fund (CERF), Flash Appeals and the Consolidated Appeal Process (CAP);
- complement and support the inter-agency contingency planning process and WFP’s cluster-lead responsibilities; and
- feed into emergency preparedness planning carried out by national authorities and other partners in-country.

\(^{18}\) Please refer to section 3.4.
Slow-onset disasters

Slow-onset disasters give humanitarian actors more time to get ready for the anticipated event; thus, preparations for them differ from those for sudden-onset events. In these contexts continuous monitoring systems will enable WFP Country Offices to assess the scope and course of the crisis more accurately. As soon as they realise that a slow onset disaster, such as a drought, is about to unfold, Country Offices must intensify their monitoring.

Preparedness for slow-onset disasters is often hampered by other factors like public unawareness, and this can lead to shortfalls in funding for the necessary scale-up of operations at the beginning of the crisis. Awareness-raising and the mobilization of funds are therefore essential parts of preparedness in the early stages of a slow-onset disaster. Sound analysis and extensive monitoring will enable the Country Office to provide periodic alerts and to present a coherent and proportional response strategy. In preparing a Concept of Operations\textsuperscript{19} Country Offices will find the EPRP’s Communications template useful. It is a concise document which will act as a guide to presenting WFP’s operational response strategy to the impending crisis to donors, media and the general public in a clear and well-structured manner.

\textsuperscript{19} For the CONOPS template please see section 3.4.
2.2.3 Concept of Operations Template

When a Country Office identifies a need to step up its preparedness and it decides to implement the ERAs for one or more risks that have become imminent, the Country Office has the option to develop a Concept of Operations (CONOPS). A CONOPS is based on information gathered via the guidance questions that precede each ERA checklist. It should help the Country Office to structure its response activities before or in the immediate aftermath of an emergency. The objectives of the CONOPS are to:

- communicate in a concise and clear manner the anticipated scope of the disaster, and the nature and scope of WFP’s planned operational response at Country Office, Regional Bureau and Headquarters levels;
- support the timely drafting of an Immediate Response Emergency Operation (IR-EMOP) if the risk materialises;
- clearly explain WFP’s response strategy to the imminent risk to the host government, UN partner agencies and other relevant stakeholders; and
- facilitate input and access to IA-funding mechanisms.

It may be important to reflect specific challenges in the CONOPS. In order to identify these challenges, each Country Office unit should go through the guidance questions which precede the unit-specific ERA checklist.

2.2.4 Standard Operating Procedures (SOPs) for the First 72-Hour Response

Standard Operating Procedures (SOPs) for the First 72-Hour Response represent the third checklist and should be implemented as soon as the disaster strikes. SOPs are meant to guide the Country Office in its initial emergency response when decisions have to be taken fast\(^\text{20}\) and critical actions cannot be overlooked. Country Office Management and essential staff should review the SOPs at the ERA stage — i.e. once a risk becomes imminent — and assign responsibilities ahead of a disaster. Heads of Units (HOU) are responsible for ensuring that their unit members are familiar with the SOPs, and should have a hard copy to hand and available to their...

---

\(^\text{20}\) The SOPs of the EPRP are complementary to the Critical Incident SOPs that have been developed for Headquarters.
staff members at all times. The objectives of the SOPs are to:

- promote the health and safety of all WFP staff and employees;
- maintain WFP’s resilience and augment its operational capability (e.g. through the Immediate Response Account [IRA], Emergency Operations [EMOPs] and Special Operations [SO]);
- facilitate coordination within WFP and with partners. This also applies when WFP is the cluster lead.

2.3 Supporting Documents and Roles and Responsibilities

2.3.1 The EPRP at Area Office and Sub-Office levels

57. Being prepared and ready to respond to emergencies is important not only at Country Office level but also at Area and Sub-Office levels, and it is recommended that the EPRP is also implemented in these offices. The process is almost the same. It begins with validation of the risk assessment undertaken by the Country Office, but the scope of the assessment is adjusted to take into account factors specific to those or Area or Sub-Offices’ contexts. After the assessment has been validated the EPR checklists are implemented. These may need to be adapted for each Area or Sub-Office to allow for offices’ different structures, functions and sizes. Very small Area or Sub-Offices with only three to five staff may find that they only need to go through the MPA checklist and SOPs for Management, but large Area or Sub-Offices might find it more useful to go through all of the checklists that are applicable to their functional units. Annex 38 provides examples of MPA and ERA checklists, as well as SOPs, which have been tailored to the Area/Sub-Office context in pilot countries.

2.3.2 Roles and Responsibilities

Country Office Management

58. Country Office Management (usually, the Country Director [CD] and the Deputy Country Director [DCD]) is accountable for the implementation of the whole EPRP. The Country Office Management selects and directly supervises the EPRP technical Focal Point. The Risks Register, the
Minimum Preparedness Actions Checklists and, if implemented, the Emergency Readiness Actions Checklists, need to be approved and signed off by the Country Director. The Country Office Management also decides if and when to implement the ERAs to step up the Country Office’s preparedness level for risks that have become imminent.

**EPRP Focal Point**

59. The EPRP Focal Point is appointed by Country Office Management and supports the implementation of the EPRP in the Country Office as well as Area and Sub-Offices. The Focal Point’s main responsibilities are facilitating the risk assessment exercise and consolidating the various units’ checklists. He/she is also responsible for compiling and maintaining the Country Office emergency folder. He/she is the custodian of the final document and should update it periodically, especially when the risk profile of the country changes.

**Heads of Units**

60. Heads of Units (HOUs) are accountable for the implementation of their own Unit’s checklist. They are encouraged to coordinate with other HOUs and the Country Office Management for cross-unit issues.

**Individual staff members**

61. Every staff member needs to participate in the emergency preparedness process so that the Country Office can achieve the highest possible standard of emergency preparedness. Staff members are responsible for implementing the actions assigned to them and should meet the deadlines set in the checklists.

---

21 Please see Annex 37 for the complete TOR of the EPRP Focal Point.
2.3.3 Support Tools

EPRP web tool

62. The EPRP will also be uploaded to EPweb. The online tool will display the preparedness level of each country so that everybody can access this information easily. The Country Office EPRP Focal Point is responsible for inputting data into the system and for keeping it up-to-date. These data will be presented in a similar way to those in the EPRP checklists. EPweb can also be used to directly request support from the Early Warning Team (EWT) in Headquarters regarding the monitoring of specific risks. 22

E-Learning CD-ROM

63. The E-Learning CD-ROM is an interactive learning tool for every staff member. It guides users through the EPRP, step by step, and explains the Package’s background and purpose and how to implement the different parts. The CD-ROM can also be used as a support tool by newly-appointed EPRP Focal Points or any other staff member.

Electronic EPRP folder

64. It is strongly recommended that the Country Office ICT unit creates an electronic folder on the shared drive and stores in it core documents collected through the EPRP implementation so that they are quickly accessible at all times. The folder should contain the electronic versions of the Country Office’s risk graph, risks register, MPA, ERA, SOP checklists and all other related documents. In case a situation arises in which computers cannot be used, a hard copy of these documents should be stored in the Country Office/Area Office/Sub-Office and in a secure off-site location.

22 To access the EPRP web tool, please go to: http://epweb.wfp.org/ep2admin
65. The ODEP “Early Warning Analysis and Crisis Support Team” monitors natural hazards and socio-political developments around the globe daily in order to identify situations that could impact WFP activities or trigger new operations.

66. The Headquarters-based team can provide tailored analytical services on-demand to Country Offices and Regional Bureaux, and it can collaborate with ODEP’s Emergency Preparedness and Response (EPR) and Geographic Information Systems (GIS) teams and other Headquarters units, such as Field Security Division (ODF) and the Vulnerability Analysis and Mapping Unit (VAM), to provide comprehensive and high quality products. For instance, the team can advise Country Offices and Regional Bureaux as to how to identify, detail and monitor natural hazards and political risks, and help them define indicators and thresholds for emergency readiness actions.

67. Country Offices are encouraged to make use of Headquarters capacity when developing EPRP risk profiles. At the same time, to ensure a common WFP view of risk, Regional Bureaux are encouraged to compile a regular regional “Early Warning Matrix” that is based on Country Office risk profiles and assessments for countries where there is no WFP presence.

---

23 The ODEP Early Warning, Analysis and Crisis Support Team can be contacted through the regional EPR Focal Points or directly at wfp.early.warning@wfp.org
The checklists on the following pages are for reference only.

Working versions of the checklists are available for download at the EPRP page on EPweb at the following link: http://epweb.wfp.org/ep2/eprp/

Questions to be considered by CO Management in relation to stepping up the Emergency Readiness Level:

1) Scenario and planning assumptions:
   - What type of disaster is anticipated and in what location?
   - What are the triggers to be closely monitored?
   - What will be the humanitarian impact within the country and beyond? How many people will be affected? Will it lead to displacements? Will it lead to access challenges?
   - What is the likely response of the national government, neighbouring countries, bilateral partners, regional entities, the humanitarian community and donors?
   - What is the likely impact of the crisis on WFP’s operational capability?
   - Is the government likely to come forward with a request for assistance?
   - What would be the scope of WFP’s assistance (type of activity, number of beneficiaries, locations and duration)?
   - What would be the delivery, distribution and monitoring arrangements?
   - What are the risks and opportunities for WFP and the humanitarian community at large? Will organizations require additional security measures?

2) Coordination (internal and external) and partnership arrangements:
   - What will be the coordination arrangements at national and sub-national level? Will the Logistics, Emergency Telecommunications and/or Food Security Clusters be activated? If yes, does the CO have sufficient staff with an adequate skill set available to assume cluster coordination responsibilities?
   - Has an inter-agency contingency plan been developed for the disaster?
   - Who will be WFP’s counterparts in the national government and among the local authorities to support an emergency response?
   - What are the capacities of WFP’s partners to continue operating during an emergency response?
   - Does the CO foresee the involvement of military actors in the emergency response; if yes, is there a need for civil-military coordination?

3) Resourcing requirements (i.e. food, non-food and staffing)
   - What are the augmented resource requirements? What is the expected donor response?
   - What is the potential for rapidly accessing food and non-food items? In case of local/regional purchase, what are the potential constraints and repercussions of the disaster on markets?
   - Will the scenario demand changes in the staffing structure (e.g. staff augmentation or relocation/evacuation)?
   - Will the scenario require enhanced security measures to ensure staff health and safety?
   - Can the CO absorb operational augmentation under the existing programmes in-country? Will it require an IR-EMOP and/or a Special Operation?
   - Will the CO need specific technical support from the RB and/or HQ? Does the CO foresee the need to run a simulation exercise to stress-test its emergency readiness capability?
Emergency Preparedness and Response Package

</table>
### Human Resources

#### Questions to be considered by Country Office Human Resources in relation to stepping up the Emergency Readiness Level:

- Is there a need to augment the CO Human Resources staffing structure?
- Does the CO have the facilities and procedures in place to track staff at the duty station and their dependents at all times?
- Does the CO have in place the capacity to rapidly recruit additional staff?
- What personal preparedness measures are CO staff recommended to take, and have staff been informed about them?

#### Human Resources

<td>In consultation with Security, communicate changes in security clearance requirements.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7</td>
<td>Liaise with Security on visa requirements, and obtain relevant visas for international staff and their dependents in-country to prepare for eventual evacuation, should that become necessary.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>8</td>
<td>Update the list of visa requirements for incoming international staff. If restrictions are encountered, liaise with RB for support and find solutions.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

---

62 Staff includes TDYers and staff on R&R in the CO/AO/Sub-Office. For a sample of a staff tracking system please refer to Annex 33.
Questions to be considered by Country Office Programme in relation to stepping up the Emergency Readiness Level:

- Does the CO have sufficient skilled staffing capacity in Programme to conduct assessments, augment operations, and fulfil its Food Security Cluster co-lead responsibilities, if the Cluster is activated?
- What is the likely impact of the disaster on WFP's ongoing programme activities? How will the disaster impact on WFP's key partners?
- Does the CO have enough information about the population likely to be affected by the disaster? For instance, are sufficient data available concerning demographic statistics, food security and nutrition status, and local food economies? Are there any information gaps that need to be filled through assessments?
- Will WFP engage partners in these assessments? Is there a need for training assessment team members?
- Does the CO have sufficient logistical support (such as vehicles, aircraft, and GPS) and ICT communications equipment (computers, radio handsets, etc.) for assessment teams?
- Does the CO want to request an IRA Preparedness for funding assessment activities?
- What type of new activities may be required? What would be the most appropriate assistance, taking into account local food habits, the functioning of food markets and other food sources, and access to cooking facilities and water?
- What will be the geographic targeting and beneficiary selection criteria?
- What will be the distribution and monitoring arrangements during the emergency phase? Will those arrangements require additional partners, training, equipment and/or tools?
- What measures need to be put in place to ensure the protection of beneficiaries during food distributions?
- In collaboration with Logistics, try to project how long current food stocks and expected consignments will cover the estimated needs. What are the outstanding requirements?

For checklist, see following page.
<table>

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

\(^{63}\) For Terms of Reference of the Food Security Cluster please refer to Annex 35.  
\(^{64}\) For generic checklists, questionnaires, and guidance material for initial and rapid food security assessments please refer to Annex 10.  
\(^{65}\) For more details and guidance on how to use the Programme Impact Matrix please refer to Annex 19.  
\(^{66}\) For more details and guidance on how to use the Programme Criticality Matrix please refer to Annex 19.  
\(^{67}\) For IR-EMOP and EMOP budget templates please refer to Annex 5 and 20.  
\(^{68}\) For information on different good practices please contact the Humanitarian Policy and Transition Service (PSH) in HQ.
Questions to be considered by Country Office Pipeline in relation to stepping up the Emergency Readiness Level:

- Is there a need to augment the CO staffing structure in Pipeline?
- Does the CO have enough informed Pipeline Officers to meet increasing reporting demands?
- What potential problems might there be for Pipeline’s current structure during the expected disaster?

<table>
<thead>
<tr>
<th>No.</th>
<th>Emergency Readiness Actions (ERAs)</th>

### Food Procurement

#### Questions to be considered by Country Office Food Procurement in relation to stepping up the Emergency Readiness Level:

- Is there a need to augment the CO staffing structure in Food Procurement?
- What are the likely impacts of the disaster on local and regional food markets?
- What are the local and regional food procurement options during an emergency phase?
- What might be the impact of WFP’s response on local and regional food markets?
- What are the food processing and food transformation facilities in the country and in the region?

<table>
<thead>
<tr>
<th>No.</th>
<th>Emergency Readiness Actions (ERAs)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Step up the monitoring of prices of main food commodities in local as well as regional markets. Monitor the latter with assistance from RB.</td>
</tr>
<tr>
<td>2</td>
<td>Set up a shortlist of local and (with RB) regional food suppliers with potential capacity to deliver during an emergency.</td>
</tr>
<tr>
<td>3</td>
<td>Identify food reserves at national level, assess the government’s food reserve policy, and determine opportunities for loans/donations.</td>
</tr>
<tr>
<td>4</td>
<td>In liaison with FAO, identify local and regional food processing and food transformation options, as required, and ascertain mechanisms for quality testing.</td>
</tr>
<tr>
<td>5</td>
<td>Have at hand key food commodity prices that will facilitate the rapid compilation of an IR-EMOP and/or EMOP budget.</td>
</tr>
</tbody>
</table>

---

68 For IR-EMOP and EMOP budget templates please refer to Annex 5 and 20.
Non-Food Procurement

Questions to be considered by Country Office Non Food Procurement in relation to stepping up the Emergency Readiness Level:

- Does the CO need a stock of basic necessity items to attend to staff needs?
- Does the CO need additional vehicles (including armoured vehicles) to transport staff? Are sufficient fuel reserves in place for WFP vehicles?
- Does the CO have generators in place to ensure an unhampered supply of electricity?

<table>
<thead>
<tr>
<th>No.</th>
<th>Emergency Readiness Actions (ERAs)</th>
<th>Status</th>
<th>Due date/Timeframe</th>
<th>Lead</th>
<th>Resource Requirement (US$)</th>
<th>Comments</th>
</tr>
</thead>
</table>
| 1   | Review local and regional procurement options, including the availability of non-food items (NFIs) at UNHRD:  
  - Compile a list of local/regional non-food suppliers that have capacity to continue supplying during an emergency;  
  - Draw up long-term agreements;  
  - If LTAs do not exist, prepare Purchase Requisitions/Purchase Orders (PRs/POs) for essential NFIs. | Done | | | | |
| 2   | Discuss with on-site service contractors the likely implications of the anticipated event and seek ways to ensure continuity of services through existing contractors and/or alternative arrangements (supply of stationery, water, transportation, spare parts, and fuel, etc.). | | | | | |
| 3   | Review options for seeking loans/leases of critical NFIs from partners. | | | | | |

70 For a long-term agreement sample please refer to Annex 13.
Logistics

Questions to be considered by Country Office Logistics in relation to stepping up the Emergency Readiness Level:

✓ Is the LCA up-to-date?
✓ If the Cluster is activated does the CO have sufficient skilled Logistics staffing capacity to update the LCA, augment operations, and fulfil its Logistics Cluster-lead responsibilities?
✓ Do you foresee that other agencies might request logistics services from WFP?
✓ Will there be a need for more COMPAS stations?
✓ Does the CO need support from the Global Logistics Support Cell and ALITE for the deployment of stand-by partners, and for drafting a Special Operation, etc.?
✓ Can the needs for logistics augmentation be covered by the current operation or does it require the launch of a Special Operation? Will it be necessary to launch an air operation for cargo and/or passenger services (UNHAS)?
✓ Will there be a need for the deployment of emergency kits and other emergency logistics support equipment, such as mobile storage units, from the UNHRD network?
✓ Will the disaster have an impact on import or export regulations?
✓ How will the disaster impact on WFP’s contractors and suppliers?
✓ Where are the in-country storage locations and what are their capacities? Are they located in secure areas and protected from the effects of the anticipated disaster (e.g. floods)? If storage capacity needs to be augmented, will the CO require third-party service providers?
✓ What are the delivery routes from WFP warehouse(s) in the country to the affected area and how easily accessible are they?
✓ Does the CO have enough in-country transport capacity to serve primary, secondary and tertiary legs? If not, how could capacity be increased?
✓ What could be the alternative transport modes to reach the affected population? What would be the schedule for opening new routes? What actions would be required from the government, WFP and others?
✓ Are additional security arrangements required on transport routes and/or at storage facilities? What would be the costs of augmenting security measures?
✓ How will the anticipated emergency response affect the current landside transport, storage and handling (LTSH) rate?
✓ How much food is currently available in stock? How much food is en route and how long will it take to arrive?
✓ In collaboration with Programme and Pipeline, project for how long the total estimated food needs will be covered by current food stocks and expected consignments.
✓ Will there be a need for international or national military or civil defence assets? If yes, has the need been discussed with the Humanitarian Country Team?

For checklist, see following page.
<table>
<thead>
<tr>
<th>No.</th>
<th>Emergency Readiness Actions (ERAs)</th>
<th>Status</th>
<th>Due date/Timeframe</th>
<th>Lead</th>
<th>Resource Requirement (US$)</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Revise the LCA, if necessary.(^{71})</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>Based on initial relief requirements estimated by Programme, and the food available in the country and en route, review the need for pre-positioning of food and/or logistical assets at EDPs and arrange necessary pre-positioning.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>3</td>
<td>Have key transport and logistics rates at hand in order to facilitate the rapid compilation of an IR-EMOP and a Special Operation, as required.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>4</td>
<td>Call for an inter-agency logistics coordination meeting (or cluster meeting, if activated)(^{72}) to determine existing logistics capabilities and augmentation needs.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>Create an inventory of spare logistics capacity (transport and warehousing, etc.). Identify requirements for additional logistics support equipment (e.g. prefabs, pallets, generators, scales and MSUs, etc.), and determine modes/schedules for the acquisition of such equipment.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>6</td>
<td>Identify contractors able to ensure the fumigation of warehouses and food items should infestation occur. If contractors are not available, ensure that fumigation equipment and products are stockpiled and easily accessible, and train staff how to use them properly.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>7</td>
<td>Review the main service providers’ availability and competency to support augmented logistics operations. These suppliers include UNHRD, local and regional suppliers, airport/port, customs and civil aviation authorities, transporters, aircraft operators and warehouse owners, etc.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>8</td>
<td>Update the shortlists of potential service providers and draft Requests for Quotations,(^{73}) as required.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>9</td>
<td>Review the need for air support, including United Nations Humanitarian Air Service (UNHAS) deployment: • if support is needed, contact HQ Aviation to review the procedures for deploying an air operation and to seek landing permits, and assess the need and feasibility for pre-positioning aircraft or helicopters in the region.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>10</td>
<td>Establish contacts with port authorities to identify slots for bringing in WFP shipments.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>11</td>
<td>Develop a strategy to maintain adequate and secure access to fuel (diesel, petrol and Jet A-1).</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>12</td>
<td>Contact the Global Logistics Support Cell and ALITE to ensure that logistics-related cost elements — such as transport rates and acquisition of logistics assets, etc. — are readily available so that the LTSH matrix can be revised as required.</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

\(^{71}\) For an LCA report template and LCA guidelines please refer to Annex 11 and [http://dlca.logcluster.org/](http://dlca.logcluster.org/)

\(^{72}\) For Terms of Reference of the Logistics Cluster please refer to Annex 34.

\(^{73}\) For a Request for Quotations (RFQ) template please refer to Annex 21.
4) Questions to be considered by Country Office ICT in relation to stepping up the Emergency Readiness Level:

✓ If the Cluster is activated does the CO have sufficient skilled ICT staffing capacity to support operational augmentation, and to fulfil its cluster-lead responsibilities in Emergency Telecommunications?
✓ Does the CO have sufficient information on possible clients of the ETC (e.g. location and contact details, etc.)?
✓ Does the CO have sufficient ICT and associated equipment in place for essential staff to work from home and/or in an off-site location?
✓ Does the CO have sufficient ICT communications equipment in place to cater to the needs of additional staff deployed and/or recruited? Equipment needed would include computers, mobile phones, radio sets, satellite phones and bandwidth, etc.
✓ What are the sources through which additional ICT and communications equipment could be acquired, if need be?

For checklist, see following page.
## ICT

<table>
<thead>
<tr>
<th>No.</th>
<th>Emergency Readiness Actions (ERAs)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Call for an inter-agency ICT coordination meeting (or ETC meeting, if cluster is activated)(^74) to determine existing ICT capabilities and augmentation needs.</td>
</tr>
<tr>
<td>2</td>
<td>In order to support operations, prioritize critical IT applications and services for staff and partner agencies.(^75)</td>
</tr>
<tr>
<td>3</td>
<td>Update the inventory of spare ICT and communications equipment and contact potential sources (e.g. regional stocks, local suppliers, FITTEST and FESO) to ensure that any equipment gaps can be rapidly filled.</td>
</tr>
<tr>
<td>4</td>
<td>Ensure availability and functionality of equipment that will allow staff to work from home (if terrestrial connectivity is still usable and commercial service providers are still functioning), and/or from a fully equipped off-site location. Disseminate to staff alternative operating and activation procedures for the off-site location.</td>
</tr>
<tr>
<td>5</td>
<td>Ensure that backup communication and electrical systems, associated equipment and hardware are in place and functioning, including HF/VHF, VSAT, Internet, telephone, etc., in CO/AO/Sub-Office and off-site locations. Conduct regular checks to ensure that all equipment is functioning.</td>
</tr>
<tr>
<td>6</td>
<td>Assess with partner agencies the need to set up a UN Radio Room.</td>
</tr>
<tr>
<td>7</td>
<td>Draw up a draft budget for augmented in-house ICT services and WFP’s cluster-lead responsibilities.</td>
</tr>
<tr>
<td>8</td>
<td>Remain in close contact with the Regional IT Officer (RITO), ODIF and FITTEST.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Status</th>
<th>Due date/Timeframe</th>

</tbody>
</table>

\(^74\) For Terms of Reference of the Emergency Telecommunications Cluster please refer to Annex 22.

\(^75\) For Information on IT emergency response see WFP IT Best Practices on [www.wfp.org/ict-emergency](http://www.wfp.org/ict-emergency).
Finance

Questions to be considered by Country Office Finance in relation to stepping up the Emergency Readiness Level:

- Is there a need to augment the CO staffing structure in Finance? \(^76\)
- Does the CO/AO/Sub-Office have an adequate signatory panel for its bank accounts and electronic payment systems (EPS)?
- Are those responsible or designated to perform financial transactions properly briefed about their financial responsibilities? Are the required WINGS profiles granted?
- Are the banks in which CO/AO/Sub-Office maintain bank accounts likely to function during the anticipated disaster? If not, should the CO/AO/Sub-Office operate on a cash basis or can other UN agencies perform these functions for WFP? If alternatives to conventional banking are resorted to, will they entail additional costs for WFP?
- Will the petty cash level be sufficient at CO/AO/Sub-Office level? If not, have measures been put in place to: 1) either increase the petty cash level to the allowed maximum level, or 2) request the opening of an imprest or sub-imprest account?
- Is the current petty cash threshold for making payments adequate? If not, have you considered the use of operational advances or opening a cash imprest or sub-imprest account?

For checklist, see following page.

\(^76\) Always ensure segregation of duties among Finance staff. In the event that complete segregation of duties cannot be observed — for instance at the early stage of an emergency and pending deployment of additional staff — ensure that this scenario is properly documented and that necessary waivers are obtained from the Executive Director or her delegate.

</tbody>
</table>
| 3   | Assess whether the banks in which WFP maintains its accounts have the capacity to continue operating and to meet WFP cash requirements in the event of an emergency:  
  • If yes, review the need of opening an imprest/sub-imprest account;  
  • If no, determine whether WFP may have to work on a cash basis. If so, agree on procedures for cash replenishment, disbursements and safeguarding,77 in consultation with RFO. |  |  |  |  |  |
| 4   | Identify whether it is necessary to request an increase in the petty cash level and threshold at CO/AO/Sub-Office. |  |  |  |  |  |
| 5   | Review the checklist of documentation required to support all financial transactions and ensure that such documentation remains readily accessible in the event of a disaster. |  |  |  |  |  |

77 Each cash advance of more than US$5,000 requires a safe with combination and keys, and a safe inventory.
**Administration**

Questions to be considered by Country Office Administration in relation to stepping up the Emergency Readiness Level:

- Is there a need to augment the CO staffing structure in Administration?
- Does the CO need to open new/additional office sites to accommodate an augmented staffing structure? If yes, what are the site preparation requirements?

<table>

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

[^78]: For a sample Goods and Services Plan please refer to Annex 23.
[^79]: Mobile phones are to be provided by ICT.
Security

Questions to be considered by Country Office Security in relation to stepping up the Emergency Readiness Level:

- Is there a need to augment the CO staffing structure in Security?
- Will the crisis or disaster lead to changes in the security situation?
- If yes, will these changes allow the CO to function with the current staffing structure? Will these changes require relocation or evacuation of staff?
- Will there be a need for additional security measures?
- Will CO staff and partners be able to access office premises and operational areas?
- Are support and the ability to analyse the security situation in the operational area adequate?
- Are additional security arrangements required on transport routes and/or at storage facilities? What would augmenting security measures cost?
- Is there a need for additional safety measures at distribution points?

For checklist, see following page.

82 For sample Talking Points and Q&As please refer to Annex 15.  
83 For guidelines on how to update CO Country Pages please refer to the Guidance for Country Editors and the links to tutorials provided in Annex 16.
Questions to be considered by Country Office Reporting in relation to stepping up the Emergency Readiness Level:

- Is there a need to augment the CO staffing structure in Reporting?
- Does the CO have enough informed Reports Officers who could meet increasing reporting demands?
- Are the currently-used reporting templates and tools adequate for the new situation or do they need to be adapted?
- Who is to receive what kind of information and when? Are distribution lists likely to change?

\(^{86}\) Such reports may include Sitreps, Executive Briefs, and Nightly Notes for which general information, reporting templates and/or samples can be found in Annex 18.
3.3 Standard Operating Procedures for the First 72-Hour Response
<table>
<thead>
<tr>
<th>Type of event:</th>
<th>Outbreak of a slow- or sudden-onset disaster.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Objectives:</td>
<td>• Promote the health and safety of all WFP staff and employees.</td>
</tr>
<tr>
<td></td>
<td>• Maintain WFP's business continuity and augment its operational capability (e.g. through IR-EMOPs and Special Operations).</td>
</tr>
<tr>
<td></td>
<td>• Facilitate coordination within WFP and with partners, including as cluster lead.</td>
</tr>
<tr>
<td>When:</td>
<td>Within first 72 hours of a crisis/disaster.</td>
</tr>
<tr>
<td>Who:</td>
<td>All CO staff</td>
</tr>
<tr>
<td>Output:</td>
<td>• CO staff and installed dependents accounted for.</td>
</tr>
<tr>
<td></td>
<td>• Response gaps identified.</td>
</tr>
<tr>
<td></td>
<td>• Relief assistance started.</td>
</tr>
<tr>
<td></td>
<td>• WFP positioned in the inter-agency emergency response and with Government.</td>
</tr>
<tr>
<td></td>
<td>• IR-EMOP and inputs for the Concept of Operations drafted and submitted to RB/HQ.</td>
</tr>
<tr>
<td>Accountability:</td>
<td>Overall accountability for the adoption of Standard Operating Procedures lies with the CD.</td>
</tr>
<tr>
<td>No.</td>
<td>Standard Operating Procedures for the First 72-Hour Response (SOPs)</td>
</tr>
<tr>
<td>-----</td>
<td>---------------------------------------------------------------</td>
</tr>
<tr>
<td>1</td>
<td>Account for all staff and dependants, including staff on mission and R&amp;R, and promote health and safety.</td>
</tr>
<tr>
<td>2</td>
<td>Conduct an initial briefing with staff present in the office and remind them to implement the respective SOPs.</td>
</tr>
</tbody>
</table>
| 3   | Contact the Regional Director and the Director of Emergencies to:  
|     | • inform them about the disaster;  
|     | • obtain endorsement for the CO to offer assistance to the government;  
|     | • determine the need for Task Force Meetings and whether WFP’s emergency response is to be treated as a Corporate Emergency.87 |      |          |
| 4   | Contact the emergency Focal Point in the government to better understand the humanitarian impact of the disaster and the national response capability. Seek the government’s endorsement for a WFP intervention. |      |          |
| 5   | Consult with UNCT/HCT/DMT/SMT members about the humanitarian and security impact (i.e. possible need for relocation/evacuation), cluster activation, inter-agency response plans and coordination mechanisms. |      |          |
| 6   | Convene a meeting with CO essential staff to:  
|     | • Implement the decision from consultations with UNCT/HCT/DMT/SMT regarding security measures/relocation/evacuation;  
|     | • Agree on a staff augmentation, if applicable;  
|     | • Review whether it is necessary to cancel any activities or missions. |      |          |
| 7   | Define whether further office space is required to accommodate additional staff. |      |          |
| 8   | Develop a Concept of Operations.88 |      |          |
| 9   | Advise the Regional Director and Director of Emergencies on critical resource requirements (i.e. food, non-food and staffing). |      |          |
| 10  | Draft an IR-EMOP and inputs for a CONOPS Logistics/Special Operation, as necessary, and submit them to the Regional Bureau and ODL for processing.89 |      |          |

---

87 Please refer to the Activation Protocol for Responding to Corporate Emergencies (ED2006/003) in Annex 25.
88 For the Concept of Operations template please refer to section 3.4.
89 For guidance on how to draft an IRA EMOP and a Special Operation, and for CONOPS logistics samples, please refer to Annexes 20, 26 and 27.

For a Situation Report template please refer to Annex 18.
3.4 Concept of Operations Template

Background

General context: Please give a concise overview of the situation in the affected country/region and of the crisis’s origin(s), background and effects.

Recent developments: Please explain the latest developments in the situation (e.g. political developments, conflict intensification, population movement, increase in flooding, etc.)

WFP’s current operational structure: Please provide a brief outline of WFP’s structure in the country; any current operations, such as ongoing EMOPs, PRROs, etc.; and any response to the crisis that has been provided through operations that pre-dated the crisis.

Scope of Emergency

Planning assumptions: Please specify the anticipated scale of the affected population/vulnerable groups; the additional WFP caseload; the geographic area of assistance and how the situation may affect, and/or necessitate change in, on-going operations.

Security: Please list and explain any security concerns that relate to WFP staff, beneficiaries and operations.

Operational constraints: Please list critical areas for WFP’s assistance and obstacles to provision in those areas, such as communication difficulties, import restrictions, visa restrictions, access constraints, etc.
**WFP’s operational response**

**Operation objective:** Please try to specify the objective of WFP’s planned operation (e.g. to meet the basic nutritional needs of the people most affected by the crisis by providing food assistance).

**Programme:** Please explain the planned Programme activities.

i. Basic conclusions of assessments already carried out, or a short summary of planned assessments. (Summaries of findings must not exceed three lines and should not detail methodology, etc.)

ii. What is the planned Programme approach, including activities (i.e. new activities/modified existing activities; targeting; food/cash/vouchers; and which modality — general food distribution (GFD), safety net, etc.)?

iii. How does WFP plan to carry out the activities (i.e. partners, pre-positioning, technology, etc.)?

iv. Distribution. Who will be WFP’s partners?

**Logistics and Procurement:** Please specify the arrangements and plans with regard to:

i. Logistical support needs. What will they be (SO, UNHAS)?

ii. Storage: briefly describe WFP’s logistic capacity in the country. If applicable, also describe government and other capacities that WFP could use.
Coordination

Briefly summarise WFP’s coordination mechanisms with the government, the implementing partners and other stakeholders. If applicable, also specify WFP-led cluster activities (ETC, Logistics, Food Security) and IASC-activities.

Anticipated Resource Requirements

Food: Please specify the overall needs for food, pointing out what can be covered through existing Pipeline arrangements.

Budget: Please summarise expected needs for the amended budget and specify possible options that have been identified to cover these funding needs. If this document outlines two or more operations, then the budget for each should be summarised separately.

Operational capacity: Please summarise likely additional operational capacity requirements (offices, staff, vehicles etc.), and state how they will be addressed (recruitment, TDY, partnerships, etc.).
68. WFP has an obligation to ensure a minimum level of emergency preparedness in countries in which it is not present. This applies especially to those countries that are prone to any contextual risks outlined in paragraph 33, and that are likely to request humanitarian assistance and/or cluster support in the event of a disaster. Regional Bureaux play an important role in this regard, coordinating closely with ODEP, ODL, ODI, and ODXF etc., as well as with regional inter-agency preparedness networks.

69. Emergency preparedness in priority countries where WFP is not present includes:

- risk identification and monitoring through early warning systems;
- collection of data and other types of information concerning the livelihoods of local populations and the operating environment;
- identification of national and regional emergency response capabilities and options (through the government, partner agencies on the ground and WFP structures in neighbouring countries);
- identification of opportunities to link up with national and regional emergency preparedness initiatives.

70. Regional Bureaux are also advised to:

- monitor at Country Offices and UNHRDs within the region the availability of food stocks, logistics equipment and ICT kits which can be called forward in an emergency;

---

104 ODEP: Emergency Preparedness and Response Branch (WFP Headquarters)
105 ODL: Logistics Division (WFP Headquarters)
106 ODI: IT and Facilities Management Services Division (WFP Headquarters)
107 ODXF: WFP Food Security Analysis Service
• compile a list of staff per functional area who can be called upon for immediate deployment; and

• explore with RM\textsuperscript{108} possibilities and procedures for working on a cash basis and for manually recording transactions in case of disruption of the banking system and/or system outage.

71. In cases where WFP does not have enough information (either within the organization or from secondary sources), it is recommended that the relevant Regional Bureau, with the support of Headquarters, launches a multi-functional emergency preparedness mission to the country concerned.\textsuperscript{109} The information gathered will be consolidated at Regional Bureau level and made available on EPweb. If the risk level persists or if the country environment changes drastically, the Regional Bureau shall update the information through established contacts or a follow-up mission.

72. Once a disaster strikes, the Regional Bureau, in consultation with the Director of Emergencies, will field a start-up emergency response team to the country concerned. The team will be headed by an Emergency Coordinator and will seek administrative and logistics support through partners on the ground (e.g. UNDP) in order to become operational. It will work with the Resident Coordinator and the Humanitarian Coordinator on coordination issues. It will seek their support in developing a working relationship with the government to agree on the scope and modalities of a WFP intervention, including cluster support. The team will set up the necessary WFP management and operational structures. It will carry out a rapid Emergency Food Security Assessment and an LCA (if not done beforehand), define partnership arrangements, assume cluster responsibilities and start relief assistance. The mission will coordinate with all relevant stakeholders on the ground, including donor representatives.

\textsuperscript{108} RM: Resource Management and Accountability Department

\textsuperscript{109} The options for applying for an IRA Preparedness can be taken into consideration to improve the preparedness in countries where WFP is not present. For the directive please refer to Annex 5.
4.1 Terms of Reference for a Multi-functional Emergency Preparedness Mission

1. Meet with representatives of UN agencies and other key partners among the NGO community, the Red Cross and Red Crescent Movement, regional/global financial institutions and donors to determine:

   • the risk profile of the country (including triggers);
   • the likely humanitarian impact of the risks identified;
   • risk monitoring capacities in place;
   • the emergency preparedness and response strategy within the international aid community;
   • potential coordination and partnership arrangements in an emergency response (including the need for cluster activation);
   • food aid policy and strategy within the country;
   • potential administrative and operational support required by a WFP start-up team; and
   • potential funding sources.

2. Meet with line ministries, including the government’s emergency focal point, to assess:

   • the emergency preparedness and response capacity of the national government;
   • whether the government is likely to come forward with a request for WFP’s assistance in the event of a disaster (including as cluster lead);
   • potential coordination and partnership arrangements in an emergency response, including the nomination of Focal Points within the government and WFP; and
   • risks and opportunities for WFP.
3. **Conduct the following assessments:**

   - a Food Security Assessment, including food market analysis, to determine the vulnerability profile of the local population, the most appropriate programme tools (e.g. food/cash/vouchers), and the potential scope of a WFP intervention and its partnership arrangements;

   - a Logistics Capacity Assessment (LCA) to identify points of entry (and their capacity), customs clearance procedures, the transport market, warehousing capacity and infrastructure; and

   - a Security Assessment¹¹⁰ to determine what security measures to put in place to protect WFP staff, assets and premises, should WFP establish a presence.

4. **Identify options for:**

   - rapidly accessing food and non-food items from the regional UNHRD and/or food stocks held at national level by government, NGOs, the Red Cross and Red Crescent Movement and the private sector;

   - office accommodation and transportation of staff;

   - contracting services, employing national/local staff, and processing payments; and

   - regional/local food procurement.

5. **Draw up a proposal for the composition of an initial emergency response team, including:**

   - an Emergency Coordinator, supported by Programme, Logistics, Human Resources, Finance/Administration, ICT, Communications/Reporting staff; and

   - the identification of potential team members who could commence deployment preparation.

---

¹¹⁰ Depending on information available through UNDSS.
4.2 Terms of Reference for a Start-up Emergency Response Team

1. Establish contact with line ministries, including the government’s emergency focal point, to determine:
   - the humanitarian impact of the disaster;
   - the emergency response capability of the national government;
   - the scope of WFP’s emergency assistance, based on the government’s request;
   - coordination and partnership arrangements, including nominating Focal Points within the government and WFP; and
   - risks and opportunities for WFP.

2. Meet with UN agencies, cluster partners and the donor community to determine:
   - the humanitarian and security impact of the emergency;
   - inter-agency response plans and coordination mechanisms (including the need for cluster activation);
   - operational response mechanisms; and
   - potential funding sources.

3. Assume cluster-lead responsibilities as required:
   - determine membership and coordination structures of Food Security, Logistics and ECT clusters, as applicable in the given context; and
   - determine cluster partners’ service requirements and estimate related costs.
4. Assessments

- Conduct an *Emergency Food Security Assessment* to determine food assistance needs among the affected population, suitable Programme tools (food/cash/vouchers), and funding requirements.

- If it has not been done already, conduct a Logistics Capacity Assessment to identify points of entry (and their capacity), customs clearance procedures, the transport market, warehousing capacity and infrastructure.

5. Project formulation

- Draw up IR-EMOP, EMOP and Inter-Agency appeal requests (e.g. CERF, Flash Appeal, CAP) as well as donor proposals.

- Draw up inputs for a CONOPS logistics and/or SO (if required) and submit to ODL.

6. Implementation

**HR**

- Initiate the recruitment of local and national staff.

- Facilitate deployment of international staff and stand-by partners (e.g. by addressing visa and security clearance requirements) and identify adequate support mechanisms in the duty station (e.g. the provision of accommodation and transportation).

**Programme**

- Define Programme modalities, including Programme tools such as food/cash/vouchers.

- Identify Cooperating Partners and draw up partnership agreements.

- Initiate distributions and put in place monitoring arrangements.
### Food Procurement
- Identify local food procurement and food transformation options (if applicable).

### Logistics
- Process customs clearance for incoming emergency cargo.
- Mobilize transport and warehousing arrangements.
- Initiate deliveries of relief items to beneficiaries and cluster partners.

### ICT
- Install essential ICT equipment, internet connections and communication systems in newly-deployed office sites, and extend services to cluster clients, as required.

### Finance
- Establish cash requirements and payment modalities.
- Put in place a suitable panel of approving and certifying officers.\(^{112}\)
- Open an imprest/sub-imprest account.
- Establish a suitable Country Office/Sub-Office signatory panel for bank accounts and electronic payment systems (EPS).
- Appoint disbursing officer(s) and petty cash account holders/cashiers.
- Ensure that a cash safe is available at all office sites for the safekeeping of cash, fuel coupons and other important items and documents.

\(^{112}\) Ensure segregation of duties at all times in compliance with CF02006/003 “Policy on Procedural Change on the Delegation of Financial Authority”.
• Identify office space and set up Country Office and Sub-Office structures. Mobilize essential equipment, supplies and services to ensure immediate functioning of the office(s) and to cater to staff needs.

• Determine transport requirements and modalities (through purchase, rent or leasing).

• Put in place adequate security measures to promote the safety of WFP staff, assets and premises.

• Complete all reporting requirements (Daily Situation Reports, Executive Briefs, and Donor Briefs, etc.).

• Draw up a County Office web page\textsuperscript{113} and feed daily updates on the situation into the EPweb Crisis Page.\textsuperscript{114}

• Respond to media queries in line with the media strategy, as agreed with HQ Communications Division.

\textsuperscript{113} For guidelines on how to update CO Country Pages, please refer to the \textit{Guidance for Country Editors} and the links to tutorials provided in Annex 16.
